Economy—overview: The economy of Saint Barthelemy is based upon high-end tourism and duty-free luxury commerce, serving visitors primarily from North America. The luxury hotels and villas host 70,000 visitors each year with another 130,000 arriving by boat. The relative isolation and high cost of living inhibits mass tourism. The construction and public sectors also enjoy significant investment in support of tourism. With limited fresh water resources, all food must be imported, as must all energy resources and most manufactured goods. Employment is strong and attracts labor from Brazil and Portugal.

under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of trans-Atlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic.

Tristan da Cunha: The island group consists of the islands of Tristan da Cunha, Nightingale, Inaccessible, and Gough. Tristan da Cunha is named after its Portuguese discoverer (1506); it was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

INTRODUCTION

Background: Saint Helena is a British Overseas Territory consisting of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha.

Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained

ECONOMY

Economy—overview: The economy depends largely on financial assistance from the UK, which amounted to about \$27 million in FY06/07 or more than twice the level of annual budgetary revenues. The local population earns income from fishing, raising livestock, and sales of handicrafts. Because there are few jobs, 25% of the work force has left to seek employment on Ascension Island, on the Falklands, and in the UK.

SAINT KITTS AND NEVIS

INTRODUCTION

Background: Carib Indians occupied the islands for hundreds of years before the British began settlement in 1623. The islands became an associated state of the UK with full internal autonomy in 1967. The island of Anguilla rebelled and was allowed to secede in 1971. Saint Kitts and Nevis achieved independence in 1983. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed. Nevis continues in its efforts to separate from Saint Kitts.

ECONOMY

Economy—overview: The economy of Saint Kitts and Nevis is heavily dependent upon tourism revenues, which has replaced sugar, the traditional mainstay of the economy until the 1970s. Following the 2005 harvest, the government closed the sugar industry after decades of losses of 3-4% of GDP annually. To compensate for employment losses, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as tourism, export-oriented manufacturing, and offshore banking. More than 200,000 tourists visited the islands in 2009. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand. The current government is constrained by one of the world's highest public debt burdens equivalent to roughly 185% of GDP, largely attributable to public enterprise losses.

SAINT LUCIA

INTRODUCTION

Background: The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even after the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity crops. Self-government was granted in 1967 and independence in 1979.

ECONOMY

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries, with a surge in foreign direct investment in 2006, attributed to the construction of several tourism projects. Although crops such as bananas, mangos, and avocados continue to be grown for export, tourism provides Saint Lucia's main source of income and the industry is the island's biggest employer. Tourism is the main source of foreign exchange, although tourism sector revenues declined with the global economic downturn as US and European travel dropped in 2009. The manufacturing sector is the most diverse in the Eastern Caribbean area, and the government is trying to revitalize the banana industry, although recent hurricanes have caused exports to contract. Saint Lucia is vulnerable to a variety of external shocks including volatile tourism receipts, natural disasters, and dependence on foreign oil. The public debt-to-GDP ratio is about 77% and high debt servicing obligations constrain the KING administration's ability to respond to adverse external shocks. Economic fundamentals remain solid, even though unemployment needs to be reduced.

SAINT MARTIN

(OVERSEAS COLLECTIVITY OF FRANCE)

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and 1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectivity. In 2010, the Dutch portion of the island became an independent nation within the Kingdom of the Netherlands.

GEOGRAPHY

Location: Caribbean, located in the Leeward Islands (northern) group; French part of the island of Saint Martin in the Caribbean Sea; Saint Martin lies east of the US Virgin Islands

ECONOMY

Economy—overview: The economy of Saint Martin centers around tourism with 85% of the labor force engaged in this sector. Over one million visitors come to the island each year with most arriving through the Princess Juliana International Airport in Sint Maarten. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported, primarily from Mexico

and the United States. Saint Martin is reported to have the highest per capita income in the Caribbean.

ECONOMY

Economy—overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France

had sought. France heavily subsidizes the islands to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

SAINT VINCENT AND THE GRENADINES

INTRODUCTION

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the United Kingdom for most of the 18th century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

ECONOMY

Economy—overview: Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity as well as remittance inflows. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. This lower-middle-income country is vulnerable to natural disasters—tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. In 2008, the islands had more than 200,000 tourist arrivals, mostly to the Grenadines, a drop of nearly 20% from 2007. Saint Vincent is home to a small offshore banking sector and has moved to adopt international regulatory standards. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was over 90% of GDP at the end of 2010. Following the global downturn, St. Vincent and

the Grenadines saw an economic decline in 2009, after slowing since 2006, when GDP growth reached a 10-year high of nearly 7%. The GONSALVES administration is directing government resources to infrastructure projects, including a new international airport that is expected to be completed in 2011.

INTRODUCTION

Background: New Zealand occupied the German protectorate of Western Samoa at the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

ECONOMY

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 3,000 people to make automobile electrical harnesses for an assembly plant in Australia. Tourism is an expanding sector accounting for 25% of GDP; 122,000 tourists visited the islands in 2007. In late September 2009, an earthquake and the resulting tsunami severely damaged Samoa, and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

SAN MARINO

INTRODUCTION

Background: The third smallest state in Europe (after the Holy See and Monaco), San Marino also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in A.D. 301. San Marino's foreign policy is aligned with that of the European Union, although it is not a member; social and political trends in the republic track closely with those of its larger neighbor, Italy.

ECONOMY

Economy—overview: San Marino's economy relies heavily on its tourism and banking industries, as well as on the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy, which supplies much of its food. San Marino boasts the world's longest life expectancy for men with 80 years. The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. San Marino has recently faced increased international pressure to improve cooperation with foreign tax authorities and transparency within its own banking sector, which generates about one-fifth of the country's tax revenues. Italy's implementation in October 2009 of a tax amnesty to repatriate untaxed funds held abroad has resulted in financial outflows from San Marino to Italy worth more than \$4.5 billion. Such outflows, combined with a money-laundering scandal at San Marino's largest financial institution and the recent global economic downturn, have contributed to a deep recession and growing budget deficit. Industrial production declined sharply in 2010, especially in the textile sector. However, San Marino has little national debt, and an unemployment rate less than half the size of Italy's. The San Marino government has

adopted measures to counter the downturn, including subsidized credit to businesses. San Marino also continues to work towards harmonizing its fiscal laws with EU members and international standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully implement global tax standards, and in 2010 San Marino signed Tax Information Exchange Agreements with most major countries. The future of the country's economy will be heavily influenced by the signing of a financial information exchange agreement with Italy, which many Italian investors see as fundamental for their business operations with San Marino.

SAO TOME AND PRINCE

INTRODUCTION

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with plantation slave labor, a form of which lingered into the 20th century. While independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and two failed coup attempts in 1995 and 2003. The recent discovery of oil in the Gulf of Guinea promises to attract increased attention to the small island nation.

ECONOMY

Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import all fuels, most manufactured goods, consumer goods, and a substantial amount of food. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome and Principe benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, which helped bring down the country's \$300 million debt burden. In August 2005, the government signed on to a new 3-year IMF Poverty Reduction and Growth Facility (PRGF) program worth \$4.3 million. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Potential exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60-40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year.

SAUDI ARABIA

INTRODUCTION

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's

official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABD AL-AZIZ bin Abd al-Rahman Al SAUD (Ibn Saud) after a 30-year campaign to unify most of

the Arabian Peninsula. A male descendent of Ibn Saud, his son ABDALLAH bin Abd al-Aziz, rules the country today as required by the country's 1992 Basic Law. Following Iraq's invasion of Kuwait in 1990, Saudi

Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation of Kuwait became a source of tension between the royal family and the public until all operational US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong on-going campaign against domestic terrorism and extremism. King ABDALLAH has continued the cautious reform program begun when he was crown prince. To promote increased political participation, the government held elections nationwide from February through April 2005 for half the members of 179 municipal councils. In December 2005, King ABDALLAH completed the process by appointing the remaining members of the advisory municipal councils. The king instituted an Inter-Faith Dialogue initiative in 2008 to encourage religious tolerance on a global level; in February 2009, he reshuffled the cabinet, which led to more moderates holding ministerial and judicial positions, and appointed the first female to the cabinet. The country remains a leading producer of oil and natural gas and holds more than 20% of the world's proven oil reserves. The government continues to pursue economic reform and diversification, particularly since Saudi Arabia's accession to the WTO in December 2005, and promotes foreign investment in the kingdom. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all ongoing governmental concerns. The 2010-11 uprising across Middle Eastern and North African countries sparked modest incidents in Saudi cities, predominantly by Shia demonstrators calling for the release of detainees and the withdrawal from Bahrain of the Gulf Cooperation Council's Peninsula Shield Force. Other relatively minor, non-Shia demonstrations focused on labor, prisoner, and infrastructure complaints. Protests in general were met by a strong police presence, with some arrests, but not the bloodshed seen in protests elsewhere in the region. King ABDALLAH in February and March 2011 announced a series of benefits to Saudi citizens including funds to build affordable housing, salary increases for government workers, and unemployment benefits. The king also announced that Riyadh would begin preparations for a second round of municipal elections in September 2011.

Flag description: green, a traditional color in Islamic flags, with the Shahada or Muslim creed in large white Arabic script (translated as "There is no god but God; Muhammad is the Messenger of God") above a white horizontal saber (the tip points to the hoist side); design dates to the early twentieth century and is closely associated with the Al Saud family which established the kingdom in 1932; the flag is manufactured with differing obverse and reverse sides so that the Shahada reads—and the sword points—correctly from right to left on both sides

note: one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Paraguay

National anthem: *name:* "Aash Al Maleek" (Long Live Our Beloved King)

lyrics/music: Ibrahim KHAFAJI/Abdul Rahman al-KHATEEB

note: music adopted 1947, lyrics adopted 1984

ECONOMY

Economy—overview: Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about 20% of the world's proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 80% of budget revenues, 45% of GDP, and 90% of export earnings. Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi nationals. Diversification efforts are focusing on power generation, telecommunications, natural gas exploration, and petrochemical sectors. Almost 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors, while Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its

large youth population, which generally lacks the education and technical skills the private sector needs. Riyadh has substantially boosted spending on job training and education, most recently with the opening of the King Abdallah University of Science and Technology—Saudi Arabia's first co-educational university. As part of its effort to attract foreign investment, Saudi Arabia acceded to the WTO in December 2005 after many years of negotiations. The government has begun establishing six "economic cities" in different regions of the country to promote foreign investment and plans to spend \$373 billion between 2010 and 2014 on social development and infrastructure projects to advance Saudi Arabia's economic development.

TRANSNATIONAL ISSUES

Disputes—international: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons: refugees (country of origin): 240,015 (Palestinian Territories) (2007)

Trafficking in persons: current situation: Saudi Arabia is a destination country for workers from South and Southeast Asia who are subjected to conditions that constitute involuntary servitude including being subjected to physical and sexual abuse, non-payment of wages, confinement, and withholding of passports as a restriction on their movement; domestic workers are particularly vulnerable because some are confined to the house in which they work

unable to seek help; Saudi Arabia is also a destination country for Nigerian, Yemeni, Pakistani, Afghan, Somali, Malian, and Sudanese children trafficked for forced begging and involuntary servitude as street vendors; some Nigerian women were reportedly trafficked into Saudi Arabia for commercial sexual exploitation

tier rating: Tier 3—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking and is

not making significant efforts to do so; the government continues to lack adequate anti-trafficking laws and, despite evidence of widespread trafficking abuses, did not report any criminal prosecutions, convictions, or prison sentences for trafficking crimes committed against foreign domestic workers (2008)

Illicit drugs: death penalty for traffickers; improving anti-money-laundering legislation and enforcement

SENEGAL

INTRODUCTION

Background: The French colonies of Senegal and the French Sudan were merged in 1959 and granted their independence as the Mali Federation in 1960. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two countries was never carried out, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance (MFDC) has led a low-level separatist insurgency in southern Senegal since the 1980s, and several peace deals have failed to resolve the conflict. Nevertheless, Senegal remains one of the most stable democracies in Africa. Senegal was ruled by a Socialist Party for 40 years until current President Abdoulaye WADE was elected in 2000. He was reelected in February 2007 and has amended Senegal's constitution over a dozen times to increase executive power and to weaken the opposition, part of the president's increasingly autocratic governing style. Senegal has a long history of participating in international peacekeeping and regional mediation.

ECONOMY

Economy—overview: Senegal relies heavily on donor assistance. The country's key export industries are phosphate mining, fertilizer production, and commercial fishing. The country is also working on iron ore and oil exploration projects. In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important

turnaround, thanks to the reform program, with real growth in GDP averaging over 5% annually during 1995-2007. Annual inflation had been pushed down to the single digits. The country was adversely affected by the global economic downturn in 2009 and GDP growth fell below 2%. As a member of the West African Economic and Monetary Union (WAEMU), Senegal is working toward greater regional integration with a unified external tariff and a more stable monetary policy. High unemployment, however, continues to prompt illegal migrants to flee Senegal in search of better job opportunities in Europe. Under the IMF's Highly Indebted Poor Countries (HIPC) debt relief program, Senegal benefited from eradication of two-thirds of its bilateral, multilateral, and private-sector debt. In 2007, Senegal and the IMF agreed to a new, non-disbursing, Policy Support Initiative program which was completed in 2010. Senegal received its first disbursement from the \$540 million Millennium Challenge Account compact it signed in September 2009 for infrastructure and agriculture development. In 2010, the Senegalese people protested against frequent power cuts. The government pledged to expand capacity by 2012 and to promote renewable energy but until Senegal has more capacity, more protests are likely and economic activity will be hindered. During the year, bakers protested government price controls on bread. Foreign investment in Senegal is constrained by Senegal's business environment, which has slipped in recent years, and by perceptions of corruption.

SERBIA

INTRODUCTION

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Various paramilitary bands resisted Nazi Germany's occupation and division of Yugoslavia from 1941 to 1945, but fought each other and ethnic opponents as much as the invaders. The military and political movement headed by Josip "TITO" Broz (Partisans) took full control of Yugoslavia when German and Croatian separatist forces were defeated in 1945. Although Communist, TITO's new government and his successors (he died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultranationalist calls for Serbian domination led to the violent breakup of Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new

Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC's leadership, Serbia led various military campaigns to unite ethnic Serbs in neighboring republics into a "Greater Serbia." These actions were ultimately unsuccessful and led to the signing of the Dayton Peace Accords in 1995. MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government's rejection of a proposed international settlement led to NATO's bombing of Serbia in the spring of 1999, to the withdrawal of Serbian military and police forces from Kosovo in June 1999, and to the stationing of a NATO-led force in Kosovo to provide a safe and secure environment for the region's ethnic communities. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became Serbia and Montenegro, a loose federation of the two republics. Widespread violence predominantly targeting ethnic Serbs in Kosovo in March 2004 caused the international community to open negotiations on the future status of Kosovo in January 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro. In February 2008, after nearly two years of inconclusive negotiations, the UN-administered province of Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia's request, the UN General

Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo's unilateral declaration of independence was in accordance with international law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that international law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ's decision and calling for a new round of talks between Serbia and Kosovo.

Flag description: three equal horizontal stripes of red (top), blue, and white—the Pan-Slav colors representing freedom and revolutionary ideals; charged with the coat of arms of Serbia shifted slightly to the hoist side; the principal field of the coat of arms represents the Serbian state and displays a white two-headed eagle on a red shield; a smaller red shield on the eagle represents the Serbian nation, and is divided into four quarters by a white cross; a white Cyrillic "C" in each quarter stands for the phrase "Only Unity Saves the Serbs"; a royal crown surmounts the coat of arms

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National anthem: *name:* "Boze pravde" (God of Justice)

lyrics/music: Jovan DORDEVIC/Davorin JENKO

note: adopted 1904; the song was originally written as part of a play in 1872 and has been used as an anthem by the Serbian people throughout the 20th and 21st centuries

ECONOMY

Economy—overview: MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in September 2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. After renewing its membership in the IMF in December 2000, Yugoslavia

continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). Belgrade has made progress in trade liberalization and enterprise restructuring and privatization, including telecommunications and small- and medium-size firms. It has made some progress towards EU membership, signing a Stabilization and Association Agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010. Serbia is also pursuing membership in the World Trade Organization. Structural economic reforms needed to ensure the country's long-term viability have largely stalled since the onset of the global financial crisis. Serbia, however, is slowly recovering from the crisis. Economic growth in 2010 was a modest 1.7%, following a 3.1% contraction in 2009, but exports rose by over 16% and manufacturing output increased 3.2%. High unemployment and stagnant household incomes are ongoing political and economic problems. Serbia signed an augmented \$4 billion Stand By Arrangement with the IMF in May 2009 that expires in April 2011. IMF conditions on Serbia constrain the use of stimulus efforts to revive the economy, while Serbia's concerns about inflation and exchange rate stability preclude the use of expansionary monetary policy. Serbia adopted a new long-term economic growth plan in 2010 that calls for a quadrupling of exports over ten years and heavy investments in basic infrastructure. Serbia is still a transitional economy with unfinished privatization and incomplete structural reforms. Major challenges ahead include: high government expenditures for salaries, pensions and unemployment; a growing need for new government borrowing; rising public and private foreign debt; and stagnant levels of foreign direct investment. Privatization revenues have fallen precipitously in recent years, while a high percentage of economic activity remains in the hands of the state. Other serious challenges include an inefficient judicial system, high levels of corruption, and an aging population. Factors favorable to Serbia's economic growth include a strategic location, a relatively inexpensive and skilled labor force, and a generous package of incentives for foreign investments.

SEYCHELLES

INTRODUCTION

Background: A lengthy struggle between France and Great Britain for the islands ended in 1814, when they were ceded to the latter. Independence came in 1976. Socialist rule was brought to a close with a new constitution and free elections in 1993. President France-Albert RENE, who had served since 1977, was re-elected in 2001, but stepped down in 2004. Vice President James MICHEL took over the presidency and in July 2006 was elected to a new five-year term.

ECONOMY

Economy—overview: Since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. GDP grew about 7-8% per year in 2006-07, driven by tourism and a boom in tourism-related construction. The Seychelles rupee was allowed to depreciate in 2006 after being overvalued for years and fell by 10% in the first 9 months of 2007. Despite these actions, the Seychelles economy has struggled to maintain its gains and in 2008 suffered from food and oil price shocks, a foreign exchange shortage, high inflation, large financing gaps, and the global recession. In July 2008 the government defaulted on a Euro amortizing note worth roughly US\$80 million, leading to a downgrading of Seychelles credit rating, but in October 2010 the EU approved a \$2.9 million grant as part of a larger four-year program for Seychelles. In response to Seychelles successful implementation of tighter monetary and fiscal policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism, but the economy recovered in 2009-10 with a notable increase in tourist numbers for 2010.

SIERRA LEONE

INTRODUCTION

Background: Democracy is slowly being reestablished after the civil war from 1991 to 2002 that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about a third of the population). The military, which took over

full responsibility for security following the departure of UN peacekeepers at the end of 2005, is increasingly developing as a guarantor of the country's stability. The armed forces remained on the sideline during the 2007 presidential election, but still look to the UN Integrated Office in Sierra Leone (UNIOSIL)—a civilian UN mission—to support efforts to consolidate peace. The new government's priorities include furthering development, creating jobs, and stamping out endemic corruption.

ECONOMY

Economy—overview: Sierra Leone is an extremely poor nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its physical and social infrastructure has yet to recover from the civil war, and serious social disorders continue to hamper economic development. Nearly half of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Alluvial diamond mining remains the major source of hard currency earnings, accounting for nearly half of Sierra Leone's exports. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and supplement government revenues. The IMF has completed a Poverty Reduction and Growth Facility program that helped stabilize economic growth and reduce inflation and in 2010 approved a new program worth \$45 million over three years. Political stability has led to a revival of economic activity such as the rehabilitation of bauxite and rutile mining, which are set to benefit from planned tax incentives. A number of offshore oil discoveries were announced in 2009 and 2010. The development on these reserves, which could be significant, is still several years away.

SINGAPORE

INTRODUCTION

Background: Singapore was founded as a
 British trading colony in 1819. It joined
 the Malaysian Federation in 1963 but
 separated two years later and became inde-
 pendent. Singapore subsequently became
 one of the world's most prosperous coun-
 tries with strong international trading
 links (its port is one of the world's busiest
 in terms of tonnage handled) and with per
 capita GDP equal to that of the leading
 nations of Western Europe.

lyrics/music: ZUBIR Said

note: adopted 1965; the anthem, which was first performed in 1958 at the Victoria Theatre, is sung only in Malay

ECONOMY

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. Real GDP growth averaged 7.1% between 2004 and 2007. The economy contracted 1.3% in 2009 as a result of the global financial crisis, but rebounded nearly 14.7% in 2010, on the strength of renewed exports. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity, which has sunk to 1% growth per year in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

TRANSNATIONAL ISSUES

Disputes—international: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awards sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but does not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

SINT MAARTEN

(PART OF THE KINGDOM OF THE NETHERLANDS)

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished the island of Saint Martin to the French and Dutch, who divided it amongst themselves in 1648. The establishment of cotton, tobacco, and sugar plantations dramatically expanded slavery on the island in the 18th and 19th centuries; the practice was not abolished in the Dutch half until 1863. The island's economy declined until 1939 when it became a free port; the tourism industry was dramatically expanded beginning in the 1950s. In 1954, Sint Maarten and several other Dutch Caribbean possessions became part of the Kingdom of the Netherlands as the Netherlands Antilles. In a 2000 referendum, the citizens of Sint Maarten voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective

in October of 2010 with the dissolution of the Netherlands Antilles.

note: the flag somewhat resembles that of the Philippines, but with the main red and blue bands reversed; the banner more closely evokes the wartime Philippine flag

National anthem: name: "O Sweet Saint Martin's Land"

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, "La Marseillaise" is official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, "Het Wilhelmus" is official on the Dutch side (see Netherlands)

ECONOMY

Economy—overview: The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Over one million visitors come to the island each year—1.3 million in 2008—with most arriving through the Princess Juliana International Airport. Cruise ships and yachts also call on Sint Maarten's numerous ports and harbors. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

SLOVAKIA

INTRODUCTION

Background: Slovakia's roots can be traced to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian (Magyarization) resulted in a strengthening of Slovak nationalism and a cultivation of cultural ties with the closely related Czechs, who were themselves ruled by the Austrians. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a Communist nation within Soviet-dominated Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peacefully on 1 January 1993. Slovakia joined both NATO and the EU in the spring of 2004 and the euro area on 1 January 2009.

lyrics/music: Janko MATUSKA/traditional note: adopted 1993, in use since 1844; the anthem's music is based on the Slovak folk song "Kopala studienku"

ECONOMY

Economy—overview: Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. Reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia consolidate its budget and get on track to join the EU in 2004 and to adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has helped facilitate a foreign investment boom with business friendly policies. Slovakia's economic growth exceeded expectations in 2001-08 despite a general European slowdown. Unemployment, at an unacceptable 18% in 2003-04, dropped to 7.7% in 2008 but remains the economy's Achilles heel. Foreign direct investment (FDI) accounted for much of the growth until 2008. Cheap and skilled labor, low taxes, a 19% flat tax for corporations and individuals, no dividend taxes, a relatively liberal labor code and a favorable geographical location are Slovakia's main advantages for foreign investors. Foreign investment in the automotive and electronic sectors has been especially strong. To maintain a stable operating environment for investors, the European Bank for Reconstruction and Development advised the Slovak government to refrain from intervening in important sectors of the economy. However, Bratislava's approach to mitigating the economic slowdown has included substantial government intervention and the option to nationalize strategic companies. RADICOVA's government, in power since July 2010, has allowed the budget deficit to rise slightly, to 7.4% of GDP in 2010. GDP fell nearly 5% in 2009 before gaining back 4% in 2010, and unemployment rose above 12% in 2010, as the global recession impacted many segments of the economy.

SLOVENIA

INTRODUCTION

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though Communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2007.

Flag description: three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National anthem: *name:* "Zdravljica" (A Toast)

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; the anthem was originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

ECONOMY

Economy—overview: Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has become a model of economic success and stability for the region. With the highest per capita GDP in Central Europe, Slovenia has excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe. Privatization has lagged since 2002, and the economy has one of highest levels of state control in the EU. Structural reforms to improve the business environment have allowed for somewhat greater foreign participation in Slovenia's economy and have helped to lower unemployment. In

March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In December 2007, Slovenia was invited to begin the accession process for joining the OECD. Despite its economic success, foreign direct investment (FDI) in Slovenia has lagged behind the region average, and taxes remain relatively high. Furthermore, the labor market is often seen as inflexible, and legacy industries are losing sales to more competitive firms in China, India, and elsewhere. In 2009, the world recession caused the economy to contract—through falling exports and industrial production—by more than 8%, and unemployment to rise above 9%. Although growth resumed in 2010, the unemployment rate continued to rise, topping 10%.

TRANSNATIONAL ISSUES

Disputes—international: the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Piran Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia

Illicit drugs: minor transit point for cocaine and Southwest Asian heroin bound for Western Europe, and for precursor chemicals

SOMALIA

INTRODUCTION

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential

elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the

TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Inter-governmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG) of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December

2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was increased to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former CIC and ARS chairman as president on 31 January 2009, in Djibouti. Subsequently, President SHARIF appointed Omar Abdirashid ali SHARMARKE, son of a former president of Somalia, as prime minister on 13 February 2009. SHARMARKE resigned in September 2010 and was replaced by Mohamed Abdullahi MOHAMED, aka Farmajo, a dual US-Somali citizen who lived in the United States from 1985 until his return to Somalia in October 2010. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlines a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following national elections. However, in January 2009 the TFP amended the TFC to extend TFG's mandate until 2011.

Flag description: light blue with a large white five-pointed star in the center; the blue field was originally influenced by the flag of the UN, but today is said to denote the sky and the neighboring Indian Ocean; the five points of the star represent the five regions in the horn of Africa that are inhabited by Somali people: the former British Somaliland and Italian Somaliland (which together make up Somalia), Djibouti, Ogaden (Ethiopia), and the Northern Frontier District (Kenya)

National anthem: name: "Soomaaliyeey toosoo" (Somalia Wake Up)

lyrics/music: Ali Mire AWALE and Yuusuf Xaaji Aadan Cilmi QABILLE

note: adopted 2000; written in 1947, the lyrics speak of creating unity and an end to fighting

Government—note: although an interim government was created in 2004, other regional and local governing bodies continue to exist and control various regions of the country, including the self-declared Republic of Somaliland in northwestern Somalia and the semi-autonomous State of Puntland in northeastern Somalia

ECONOMY

Economy—overview: Despite the lack of effective national governance, Somalia has maintained a healthy informal economy, largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Somalia's service sector also has grown. Telecommu-

nication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate and are supported with private-security militias. Due to armed attacks on and threats to humanitarian aid workers, the World Food Programme partially suspended its operations in southern Somalia in early January 2010 pending improvement in the security situation. Somalia's arrears to the IMF have continued to grow.

Transportation—note: the International Maritime Bureau reports the territorial and offshore waters in the Gulf of Aden and Indian Ocean remain the region of greatest risk for piracy and armed robbery against ships accounting for 50% of all attacks in 2010; 217 vessels, including commercial shipping and pleasure craft,

were attacked or hijacked both at anchor and while underway; hijackings off the coast of Somalia accounted for 92% of all ship seizures in 2010; as of May 2011, 26 vessels and 522 hostages were being held for ransom by Somali pirates; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators have reduced piracy incidents in that body of water; in response Somali-based pirates, using hijacked fishing trawlers as “mother ships” to extend their range, shifted operations as far south as the Mozambique Channel and eastward to the vicinity of the Maldives

MILITARY

TRANSNATIONAL ISSUES

Disputes—international: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu in January 2007; “Somaliland” secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; “Puntland” and “Somaliland” “governments” seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia’s Ogaden and southern Somalia’s Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists
Refugees and internally displaced persons: IDPs: 1.1 million (civil war since 1988, clan-based competition for resources) (2007)

SOUTH AFRICA

INTRODUCTION

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked

north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments but were defeated in the Boer War (1899-1902); however, the British and the Afrikaners, as the Boers became known, ruled together begin-

ning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only referendum. In 1948, the National Party was voted into power and instituted a policy of apartheid—the separate development of the races—which favored the white minority at the expense of the black majority. The African National Congress (ANC) led the opposition to

apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa's prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime's eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 brought an end to apartheid and ushered in majority rule under an ANC-led government. South Africa since then has struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting, which has grown in recent years, came to a head in September 2008 when President Thabo MBEKI resigned, and Kgalema MOTLANTHE, the party's General-Secretary, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in April 2009. In January 2011, South Africa assumed a nonpermanent seat on the UN Security Council for the 2011-12 term.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era
note: the South African flag is the only national flag to display six colors as part of its primary design

National anthem: *name:* “National Anthem of South Africa”

lyrics/music: Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; the anthem is a combination of “N’kosi Sikelel’ iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; the official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English; the music incorporates the melody used in the Tanzanian and Zambian anthems

ECONOMY

Economy—overview: South Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that is the 18th largest in the world; and modern infrastructure supporting a relatively efficient distribution of goods to major urban centers throughout the region. At the end of 2007, South Africa began to experience an electricity crisis. State power supplier Eskom encountered problems with aged plants, necessitating “load-shedding” cuts to residents and businesses in the major cities. Growth was robust from 2004 to 2007 as South Africa reaped the benefits of macroeconomic stability and a global commodities boom, but began to slow in the second half of 2007 due to the electricity crisis and the subsequent global financial crisis’ impact on commodity prices and demand. GDP fell nearly 2% in 2009. Unemployment remains high and outdated infrastructure has constrained growth. Daunting economic problems remain from the apartheid era—especially poverty, lack of economic empowerment among the disadvantaged groups, and a shortage of public transportation. South

Africa's former economic policy was fiscally conservative, focusing on controlling inflation, and attaining a budget surplus. The current government largely follows the same prudent policies, but must contend with the impact of the global crisis and is facing growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth. More than a quarter of South Africa's population currently receives social grants. **GDP (purchasing power parity):** \$524 billion (2010 est.)

(OVERSEAS TERRITORY OF THE UK, ALSO CLAIMED BY ARGENTINA)

**INTRODUCTION****Background:** The islands, which have
large bird and seal populations, lie
approximately 1,000 km east of the Falk-
land Islands and have been under British
administration since 1908—except for a
brief period in 1982 when Argentina occu-
pied them. Grytviken, on South Georgia,
was a 19th and early 20th century whaling
station. Famed explorer Ernest SHACK-
LETON stopped there in 1914 en route to
his ill-fated attempt to cross Antarctica on
foot. He returned some 20 months later
with a few companions in a small boat andarranged a successful rescue for the rest of
his crew, stranded off the Antarctic Penin-
sula. He died in 1922 on a subsequent
expedition and is buried in Grytviken.
Today, the station houses scientists from
the British Antarctic Survey. Recognizing
the importance of preserving the marine
stocks in adjacent waters, the UK, in 1993,
extended the exclusive fishing zone from
12 nm to 200 nm around each island.**GEOGRAPHY****Location:** Southern South America, islands

Country name: *conventional long form:* South Georgia and the South Sandwich Islands
conventional short form: South Georgia and South Sandwich Islands

abbreviation: SGSSI

Dependency status: overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II

Legal system: the laws of the UK where applicable apply; the senior magistrate from the Falkland Islands presides over the Magistrates Court

Diplomatic representation in the US: none (overseas territory of the UK, also claimed by Argentina)

Diplomatic representation from the US: none (overseas territory of the UK, also claimed by Argentina)

Flag description: blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

ECONOMY

Economy—overview: Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from

postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

SOUTHERN OCEAN

INTRODUCTION

Background: A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border—the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which in turn allows for a greater abundance of animal life. In the spring of 2000, the International Hydrographic Organization decided to delimit the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees

south latitude, which coincides with the Antarctic Treaty Limit and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

GEOGRAPHY

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references: Antarctic Region

Area: *total:* 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average

winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second—100 times the flow of all the world's rivers

Elevation extremes: *lowest point:* -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources: probable large and possible giant oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits

varying widely over short distances; high winds and large waves much of the year; ship icing, especially May-October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—international agreements: the Southern Ocean is subject to all international agreements regarding the world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing)

note: many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line

between the cold polar surface waters to the south and the warmer waters to the north

Geography—note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

ECONOMY

Economy—overview: Fisheries in 2006-07 landed 126,976 metric tons, of which 82% (104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Disostichus eleginoides*—also known as Chilean sea bass), compared to 127,910 tons in 2005-06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area). International agreements were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000-01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007-08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006-07, and

29,799 in 2005-06 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica).

TRANSPORTATION

Ports and terminals: McMurdo, Palmer, and offshore anchorages in Antarctica

note: few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea (UNCLOS) to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

SPAIN

INTRODUCTION

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II but suffered through a devastating civil war (1936-39). A peaceful

transition to democracy following the death of dictator Francisco FRANCO in 1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. The government continues to battle the Basque Fatherland and Liberty (ETA) terrorist organization, but its major focus for the immediate future will be on measures to reverse the severe economic recession that started in mid-2008.

GEOGRAPHY

Location: Southwestern Europe, bordering the Mediterranean Sea, North Atlantic Ocean, Bay of Biscay, and Pyrenees Mountains; southwest of France

Geographic coordinates: 40 00 N, 4 00 W

Map references: Europe

Area: total: 505,370 sq km

country comparison to the world: 51

land: 498,980 sq km

water: 6,390 sq km

note: there are two autonomous cities—Ceuta and Melilla—and 17 autonomous communities including Balearic Islands and Canary Islands, and three small Spanish

possessions off the coast of Morocco—Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera

Area—comparative: slightly more than twice the size of Oregon

Land boundaries: total: 1,917.8 km

border countries: Andorra 63.7 km, France 623 km, Gibraltar 1.2 km, Portugal 1,214 km, Morocco (Ceuta) 6.3 km, Morocco (Melilla) 9.6 km

Coastline: 4,964 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm (applies only to the Atlantic Ocean)

Climate: temperate; clear, hot summers in interior, more moderate and cloudy along coast; cloudy, cold winters in interior, partly cloudy and cool along coast

Terrain: large, flat to dissected plateau surrounded by rugged hills; Pyrenees Mountains in north

Elevation extremes: lowest point: Atlantic Ocean 0 m

highest point: Pico de Teide (Tenerife) on Canary Islands 3,718 m

Natural resources: coal, lignite, iron ore, copper, lead, zinc, uranium, tungsten, mercury, pyrites, magnesite, fluorspar,

gypsum, sepiolite, kaolin, potash, hydro-power, arable land

Land use: arable land: 27.18%

permanent crops: 9.85%

other: 62.97% (2005)

Irrigated land: 37,800 sq km (2003)

Total renewable water resources: 111.1 cu km (2005)

Freshwater withdrawal (domestic/industrial/agricultural): total: 37.22 cu km/yr (13%/19%/68%)

per capita: 864 cu m/yr (2002)

Natural hazards: periodic droughts, occasional flooding

volcanism: Spain experiences volcanic activity in the Canary Islands, located off Africa's northwest coast; Teide (elev. 3,715 m) has been deemed a "Decade Volcano" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to its explosive history and close proximity to human populations; La Palma (elev. 2,426 m), which last erupted in 1971, is the most active of the Canary Islands volcanoes; Lanzarote is the only other historically active volcano

Environment—current issues: pollution of the Mediterranean Sea from raw sewage and effluents from the offshore production of oil and gas; water quality and quantity nationwide; air pollution; deforestation; desertification

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: Air Pollution-Persistent Organic Pollutants

Geography—note: strategic location along approaches to Strait of Gibraltar; Spain controls a number of territories in northern Morocco including the enclaves of Ceuta and Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas

GOVERNMENT

Country name: conventional long form: Kingdom of Spain

conventional short form: Spain

local long form: Reino de Espana

local short form: Espana

Government type: parliamentary monarchy

Capital: name: Madrid

geographic coordinates: 40 24 N, 3 41 W

time difference: UTC+1 (6 hours ahead of Washington, DC during Standard Time)

daylight saving time: +1hr, begins last Sunday in March; ends last Sunday in October

note: Spain is divided into two time zones including the Canary Islands

Administrative divisions: 17 autonomous communities (comunidades autonomas, singular—comunidad autonoma) and 2 autonomous cities* (ciudades autonomas, singular—ciudad autonoma); Andalusia, Aragon, Asturias, Balears (Balearic Islands), Ceuta*, Canarias (Canary Islands), Cantabria, Castilla-La Mancha, Castilla y Leon, Cataluna (Catalonia), Comunidad Valenciana (Valencian Community), Extremadura, Galicia, La Rioja, Madrid, Melilla*, Murcia, Navarra, Pais Vasco (Basque Country)

note: the autonomous cities of Ceuta and Melilla plus three small islands of Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera, administered directly by the Spanish central government, are all along the coast of Morocco and are collectively referred to as Places of Sovereignty (Plazas de Soberania)

Independence: 1492; the Iberian peninsula was characterized by a variety of independent kingdoms prior to the Muslim occupation that began in the early 8th century A.D. and lasted nearly seven centuries; the small Christian redoubts of the north began the reconquest almost immediately, culminating in the seizure of Granada in 1492; this event completed the unification of several kingdoms and is traditionally considered the forging of present-day Spain

National holiday: National Day, 12 October (1492); year when Columbus first set foot in the Americas

Constitution: approved by legislature 31 October 1978; passed by referendum 6 December 1978; signed by the king 27 December 1978

Legal system: civil law system with regional variations

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCt jurisdiction

Suffrage: 18 years of age; universal

Executive branch: chief of state: King JUAN CARLOS I (since 22 November 1975); Heir Apparent Prince FELIPE, son of the monarch, born 30 January 1968

head of government: President of the Government (Prime Minister equivalent) Jose Luis Rodriguez ZAPATERO (since 17 April 2004); First Vice President (and Minister of the Interior) Alfredo Perez RUBALCABA (since 20 October 2010), Second Vice President (and Minister of Economy and Finance) Elena SALGADO Mendez (since 8 April 2009), and Third Vice President (and Minister of Regional Affairs) Manuel CHAVES Gonzalez (since 8 April 2009)

cabinet: Council of Ministers designated by the president

(For more information visit the World Leaders website)

note: there is also a Council of State that is the supreme consultative organ of the government, but its recommendations are non-binding

elections: the monarchy is hereditary; following legislative elections, the leader of the majority party or the leader of the majority coalition usually proposed president by the monarch and elected by the National Assembly; election last held on 9 and 11 April 2008 (next to be held in March 2012); vice presidents appointed by the monarch on the proposal of the president
election results: Jose Luis Rodriguez ZAPATERO reelected President of the Government; percent of National Assembly vote—46.9%

Legislative branch: bicameral; General Courts or Las Cortes Generales (National Assembly) consists of the Senate or Senado (264 seats as of 2008; 208 members directly elected by popular vote and the other 56—as of 2008—appointed by the regional legislatures; members to serve four-year terms) and the Congress of Deputies or Congreso de los Diputados (350 seats; each of the 50 electoral provinces fills a minimum of two seats and the North African enclaves of Ceuta and Melilla fill one seat each with members serving a four-year term; the other 248 members are determined by proportional representation based on popular vote on block lists who serve four-year terms)

elections: Senate—last held on 9 March 2008 (next to be held by March 2012); Congress of Deputies—last held on 9 March 2008 (next to be held by March 2012)

election results: Senate—percent of vote by party—NA; seats by party—PP 101, PSOE 88, Entesa Catalana de Progress 12, CiU 4, PNV 2, CC 1, members appointed by regional legislatures 56; Congress of Deputies—percent of vote by party—PSOE 43.6%, PP 40.1%, CiU 3.1%, PNV 1.2%, ERC 1.2%, other 10.8%; seats by party—PSOE 169, PP 154, CiU 10, PNV 6, ERC 3, other 8; *note*—seats by party in the Congress of Deputies as of 15 December 2009—PSOE 169, PP 153, CiU 10, PNV 6, ERC 3, other 9

Judicial branch: Supreme Court or Tribunal Supremo

Political parties and leaders: Basque Nationalist Party or PNV or EAJ [Inigo URKULLU Renteria]; Canarian Coalition or CC [Claudina MORALES Rodriguez] (a coalition of five parties); Convergence and Union or CiU [Artur MAS i Gavarro] (a coalition of the Democratic Convergence of Catalonia or CDC [Artur MAS i Gavarro] and the Democratic Union of Catalonia or UDC [Josep Antoni DURAN i LLEIDA]); Entesa Catalana de Progress (a Senate coalition grouping four Catalan parties—PSC, ERC, ICV, EUA); Galician Nationalist Bloc or BNG [Guillermo VAZQUEZ Vazquez]; Initiative for Catalonia Greens or ICV [Joan SAURA i Laporta]; Navarra Yes or NaBai [collective leadership] (a coalition of four Navarran parties); Popular Party or PP [Mariano RAJOY Brey]; Republican Left of

Catalonia or ERC [Joan PUIGCERCOS i Boixassa]; Spanish Socialist Workers Party or PSOE [Jose Luis Rodriguez ZAPATERO]; Union of People of Navarra or UPN [Yolanda BARCINA Angulo]; Union, Progress and Democracy or UPyD [Rosa DIEZ Gonzalez]; United Left or IU [Cayo LARA Moya] (a coalition of parties including the Communist Party of Spain or PCE and other small parties)

Political pressure groups and leaders: Association for Victims of Terrorism or AVT (grassroots organization devoted primarily to opposing ETA terrorist attacks and supporting its victims); Basta Ya (Spanish for “Enough is Enough”); grassroots organization devoted primarily to opposing ETA terrorist attacks and supporting its victims); Nunca Mais (Galician for “Never Again”; formed in response to the oil Tanker Prestige oil spill); Socialist General Union of Workers or UGT and the smaller independent Workers Syndical Union or USO; Trade Union Confederation of Workers’ Commissions or CC.OO.

other: business and landowning interests; Catholic Church; free labor unions (authorized in April 1977); university students

International organization participation: ADB (nonregional member), AfDB (nonregional member), Arctic Council (observer), Australia Group, BCIE, BIS, CBSS (observer), CE, CERN, EAPC, EBRD, EIB, EMU, ESA, EU, FAO, FATF, IADB, IAEA, IBRD, ICAO, ICC, ICRM, IDA, IEA, IFAD, IFC, IFRCS, IHO, ILO, IMF, IMO, IMSO, Interpol, IOC, IOM, IPU, ISO, ITSO, ITU, ITUC, LAIA (observer), MIGA, MONUSCO, NATO, NEA, NSG, OAS (observer), OECD, OPCW, OSCE, Paris Club, PCA, Schengen Convention, SECI (observer), SICA (observer), UN, UNCTAD, UNESCO, UNHCR, UNIDO, UNIFIL, Union Latina, UNMIS, UNRWA, UNWTO, UPU, WCO, WHO, WIPO, WMO, WTO, ZC

Flag description: three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is

represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of “Plus Ultra” (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National anthem: *name:* “Himno Nacional Espanol” (National Anthem of Spain)

lyrics/music: none/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem has no lyrics; in the years prior to 1931 it became known as “Marcha Real” (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by “Himno de Riego” in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

ECONOMY

Economy—overview: Spain’s mixed capitalist economy is the 12th largest in the world, and its per capita income roughly matches that of Germany and France. However, after almost 15 years of above average GDP growth, the Spanish economy began to slow in late 2007 and entered into a recession in the second quarter of 2008. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and by another 0.2% in 2010, making Spain the last major economy to emerge from the global recession. The reversal in Spain’s economic growth reflected a significant decline in construction amid an oversupply of housing and falling consumer spending, while exports actually have begun to grow. Government efforts to boost the economy through stimulus spending, extended unemployment benefits, and loan guarantees did not prevent a sharp rise in the unemployment rate, which rose from a low of about 8% in 2007 to 20% in 2010. The government budget deficit worsened from 3.8% of GDP in 2008 to about 9.7% of GDP in 2010, more than three times the euro-zone limit. Spain’s large budget deficit and poor economic growth prospects have made it vulnerable to financial contagion from other highly-indebted euro zone members despite the government’s efforts to cut spending, privatize industries, and boost competitiveness through labor market reforms. Spanish banks’ high exposure to the collapsed domestic construction and real estate market also poses a continued risk for the sector. The government oversaw a restructuring of the savings bank sector in 2010, and provided some \$15 billion in capital to various institutions. Investors remain concerned that Madrid may need to bail out more trou-

bled banks. The Bank of Spain, however, is seeking to boost confidence in the financial sector by pressuring banks to come clean about their losses and consolidate into stronger groups.

TRANSNATIONAL ISSUES

Disputes—international: in 2002,
Gibraltar residents voted overwhelm-
ingly by referendum to reject any “shared
sovereignty” arrangement; the government
of Gibraltar insists on equal participa-
tion in talks between the UK and Spain;
Spain disapproves of UK plans to grant
Gibraltar greater autonomy; Morocco
protests Spain’s control over the coastal
enclaves of Ceuta, Melilla, and the islands
of Penon de Velez de la Gomera, Penon
de Alhucemas, and Islas Chafarinas, and
surrounding waters; both countries claim
Isla Perejil (Leila Island); Morocco serves
as the primary launching site of illegal
migration into Spain from North Africa;
Portugal does not recognize Spanish sov-
ereignty over the territory of Olivenza based
on a difference of interpretation of the
1815 Congress of Vienna and the 1801
Treaty of Badajoz

Illicit drugs: despite rigorous law enforce-
ment efforts, North African, Latin
American, Galician, and other European
traffickers take advantage of Spain’s
long coastline to land large shipments of
cocaine and hashish for distribution to
the European market; consumer for Latin
American cocaine and North African
hashish; destination and minor transship-
ment point for Southwest Asian heroin;
money-laundering site for Colombian
narcotics trafficking organizations and

INTRODUCTION

Background: The Spratly Islands consist of
more than 100 small islands or reefs. They
are surrounded by rich fishing grounds and
potentially by gas and oil deposits. They are
claimed in their entirety by China, Taiwan,
and Vietnam, while portions are claimed
by Malaysia and the Philippines. About
45 islands are occupied by relatively small
numbers of military forces from China,
Malaysia, the Philippines, Taiwan, and
Vietnam. Brunei has established a fishing
zone that overlaps a southern reef but has
not made any formal claim.

Natural hazards: typhoons; numerous
reefs and shoals pose a serious maritime
hazard

Environment—current issues: NA

Geography—note: strategically located
near several primary shipping lanes in
the central South China Sea; includes
numerous small islands, atolls, shoals, and
coral reefs

PEOPLE

Population: no indigenous inhabitants

note: there are scattered garrisons occupied
by military personnel of several claimant
states

GOVERNMENT

Country name: conventional long form: none
conventional short form: Spratly Islands

ECONOMY

Economy—overview: Economic activity
is limited to commercial fishing. The
proximity to nearby oil- and gas-producing
sedimentary basins suggests the potential
for oil and gas deposits, but the region is
largely unexplored. There are no reliable
estimates of potential reserves. Commer-
cial exploitation has yet to be developed.

TRANSNATIONAL ISSUES

Disputes—international: all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei, Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural

prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea," which has eased tensions but falls short of a legally binding "code of conduct"; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

INTRODUCTION

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. By May 2009, the government announced that its military had defeated the remnants of the LTTE. Since the end of the conflict, the government has resettled tens of thousands of internally displaced persons and has undertaken a number of massive infrastructure projects to reconstruct its economy.

ECONOMY

Economy—overview: Sri Lanka is engaging in large-scale reconstruction and development projects following the end of the 26-year conflict with the LTTE, including increasing electricity access and rebuilding its road and rail network. Addi-

tionally, Sri Lanka seeks to reduce poverty by using a combination of state directed policies and private investment promotion to spur growth in disadvantaged areas, develop small and medium enterprises, and promote increased agriculture. High levels of government funding may be difficult, as the government already is faced with high debt interest payments, a bloated civil service, and historically high budget deficits. The 2008-09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis, which was alleviated by a \$2.6 billion IMF standby agreement in July 2009. The end of the civil war and the IMF loan, however, have largely restored investors' confidence, reflected in part by the Sri Lankan stock market's recognition as one of the best performing markets in the world. Sri Lankan growth rates averaged nearly 5% in during the war, but increased government spending on development and fighting the LTTE in the final years spurred GDP growth to around 6-7% per year in 2006-08. After experiencing 3.5% growth in 2009, Sri Lanka's economy is poised to achieve high growth rates in the postwar period.

ECONOMY

Economy—overview: Since 1997, Sudan has been working with the IMF to implement macroeconomic reforms including a managed float of the exchange rate and a large reserve of foreign exchange. A new currency, the Sudanese Pound, was introduced in January 2007 at an initial exchange rate of \$1.00 equals 2 Sudanese Pounds. Sudan began exporting crude oil in the last quarter of 1999 and the economy boomed on the back of increases in oil production, high oil prices, and significant inflows of foreign direct investment until the second half of 2008. The Darfur conflict, the aftermath of two decades of civil war in the south, the lack of basic infrastructure in large areas, and a reliance by much of the population on subsistence agriculture ensure much of the population will remain at or below the poverty line for years to come despite rapid rises in average per capita income. Sudan's real GDP expanded by 5.2% during 2010, an improvement over 2009's 4.2% growth but significantly below the more than 10% per year growth experienced prior to the global financial crisis in 2006 and 2007. While the oil sector continues to drive growth, services and utilities play an increasingly important role in the economy with agriculture production remaining important as it employs 80% of the work force and contributes a third of GDP. In the lead up to the referendum on southern secession, which took place in January 2011, Sudan saw its currency depreciate considerably on the black market with the Central Bank's official rate also losing value as the Sudanese people started to hoard foreign currency. The Central Bank of Sudan intervened heavily in the currency market to defend the value of the pound and the Sudanese government introduced a number of measures to restrain excess local demand for hard currency, but uncertainty about the secession has meant that foreign exchange remains in heavy demand.

TRANSNATIONAL ISSUES

Disputes—international: the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; as of 2006, Chad, Ethiopia, Kenya, Central African Republic, Democratic Republic of the Congo, and Uganda

provided shelter for over half a million Sudanese refugees, which includes 240,000 Darfur residents driven from their homes by Janjawid armed militia and the Sudanese military forces; Sudan, in turn, hosted about 116,000 Eritreans, 20,000 Chadians, and smaller numbers of Ethiopians, Ugandans, Central Africans, and Congolese as refugees; in February 2006, Sudan and DROC signed an agreement to repatriate 13,300 Sudanese and 6,800 Congolese; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia proceed slowly due to civil and ethnic fighting in eastern Sudan; the boundary that separates Kenya and Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times; Sudan claims but Egypt de facto administers security and economic development of Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic

Refugees and internally displaced persons: refugees (country of origin): 157,220 (Eritrea); 25,023 (Chad); 11,009 (Ethiopia); 7,895 (Uganda); 5,023 (Central African Republic)

Trafficking in persons: current situation: Sudan is a source country for men, women, and children trafficked internally for the purposes of forced labor and sexual exploitation; Sudan is also a transit and destination country for Ethiopian women trafficked abroad for domestic servitude; Sudanese women and girls are trafficked within the country as well as possibly to Middle Eastern countries for domestic servitude; the terrorist-rebel organization, Lord's Resistance Army, continues to harbor small numbers of Sudanese and Ugandan children in the southern part of the country for use as cooks, porters, and combatants; some of these children are also trafficked across borders into Uganda or the Democratic Republic of the Congo; militia groups in Darfur, some of which are linked to the government, abduct women for short periods of forced labor and to perpetrate sexual violence; during the two decades-long north-south civil war, thousands of Dinka women and children were abducted and subsequently enslaved by members of the Missiriya and Rezeigat tribes; while there have been no known new abductions of Dinka by members of Baggara tribes in the last few years, intertribal abductions continue in southern Sudan

tier rating: Tier 3—Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; combating human trafficking through law enforcement or prevention measures was not a priority for the government in 2007 (2008)

SURINAME

INTRODUCTION

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of slavery in 1863, workers were brought in from India and Java. Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August 2010, when voters returned former military leader Desire BOUTERSE and his opposition coalition to power.

ECONOMY

Economy—overview: The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. In 2000, the government of Ronald VENETIAAN, returned to office and inherited an economy with inflation of over 100% and a growing fiscal deficit. He quickly implemented an austerity program, raised taxes, attempted to control spending, and tamed inflation. Economic growth reached about 7% in 2008, owing to sizeable foreign investment in mining and oil. Suriname has received aid for projects in the bauxite and gold mining sectors from Netherlands, Belgium, and the European Development Fund. The economy slowed in 2009, however, as investment waned and the country earned less from its commodity exports when global prices for most commodities fell. Trade picked up, boosting Suriname's economic growth in 2010, but the government's budget remained strained, with increased social spending during the election. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

TRANSNATIONAL ISSUES

Disputes—international: area claimed

by French Guiana between Riviere Litani

and Riviere Marouini (both headwaters of

the Lawa); Suriname claims a triangle of

land between the New and Kutari/Koetari

rivers in a historic dispute over the head-

waters of the Courantyne; Guyana seeks

United Nations Convention on the Law of

the Sea (UNCLOS) arbitration to resolve

the long-standing dispute with Suriname

over the axis of the territorial sea boundary

in potentially oil-rich waters

Illicit drugs: growing transshipment point

for South American drugs destined for

SVALBARD

(TERRITORY OF NORWAY)

INTRODUCTION

Background: First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

GEOGRAPHY

Location: Northern Europe, islands between the Arctic Ocean, Barents Sea, Greenland Sea, and Norwegian Sea, north of Norway

Geographic coordinates: 78 00 N, 20 00 E

Map references: Europe

Area: total: 62,045 sq km

country comparison to the world: 124

land: 62,045 sq km

water: 0 sq km

note: includes Spitsbergen and Bjørnøya (Bear Island)

Area—comparative: slightly smaller than West Virginia

Land boundaries: 0 km

Coastline: 3,587 km

Maritime claims: territorial sea: 4 nm

exclusive fishing zone: 200 nm unilaterally claimed by Norway but not recognized by Russia

Climate: arctic, tempered by warm North Atlantic Current; cool summers, cold winters; North Atlantic Current flows along west and north coasts of Spitsbergen, keeping water open and navigable most of the year

Terrain: wild, rugged mountains; much of high land ice covered; west coast clear of ice about one-half of the year; fjords along west and north coasts

Elevation extremes: lowest point: Arctic Ocean 0 m

highest point: Newton toppen 1,717 m

Natural resources: coal, iron ore, copper, zinc, phosphate, wildlife, fish

Land use:

arable land: 0%

permanent crops: 0%

other: 100% (no trees; the only bushes are crowberry and cloudberry) (2005)

Irrigated land: NA

Natural hazards: ice floes often block the entrance to Bellsund (a transit point for coal export) on the west coast and occa-

sionally make parts of the northeastern coast inaccessible to maritime traffic

Environment—current issues: NA

Geography—note: northernmost part of the Kingdom of Norway; consists of nine main islands; glaciers and snowfields cover 60% of the total area; Spitsbergen Island is the site of the Svalbard Global Seed Vault, a seed repository established by the Global Crop Diversity Trust and the Norwegian Government

ECONOMY

Economy—overview: Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox.

SWAZILAND**INTRODUCTION**

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, the world's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties remains unclear. The African United Democratic Party tried unsuccessfully to register as an official political party in mid 2006. Talks over the constitution broke down between the government and progressive groups in 2007. Swaziland recently surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

ECONOMY

Economy—overview: In this small, landlocked economy, subsistence agriculture occupies approximately 70% of the population. The manufacturing sector has diver-

sified since the mid-1980s. Sugar and wood pulp were major foreign exchange earners; however, the wood pulp producer closed in January 2010, and sugar is now the main export earner. In 2007, the sugar industry increased efficiency and diversification efforts, in response to a 17% decline in EU sugar prices. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Surrounded by South Africa, except for a short border with Mozambique, Swaziland is heavily dependent on South Africa from which it receives more than nine-tenths of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, subsuming Swaziland's monetary policy to South Africa. The government is heavily dependent on customs duties from the Southern African Customs Union (SACU), and worker remittances from South Africa substantially supplement domestically earned income. The government has also legislated that 30% of local pension funds need to be invested in Swaziland, boosting demand for government bonds. Customs revenues plummeted due to the global economic crisis and a drop in South African imports. The resulting decline in revenue has pushed the country into a fiscal crisis. The government has requested assistance from the IMF and from the African Development Bank. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006-07 because of drought, and more than one-quarter of the adult population has been infected by HIV/AIDS.

TRANSNATIONAL ISSUES

Disputes—international: in 2006, Swazi king advocates resort to ICJ to claim parts of Mpumalanga and KwaZulu-Natal from South Africa

Trafficking in persons: current situation: Swaziland is a source, destination, and transit country for women and children trafficked internally and transnationally for the purposes of commercial sexual exploitation, domestic servitude, and forced labor in agriculture; Swazi girls, particularly orphans, are trafficked internally for commercial sexual exploitation and domestic servitude, as well as to South Africa and Mozambique; Swazi boys are trafficked for forced labor in commercial agriculture and market vending; some Swazi women are forced into prostitution in South Africa and Mozambique after voluntarily migrating to these countries in search of work

tier rating: Tier 2 Watch List—the government of Swaziland does not comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government believes that trafficking probably does occur, but does not know the extent of the problem; the government does not judge trafficking to be an “important” problem and chooses to direct its limited resources towards other issues, a judgment which significantly limited the government’s current efforts to eliminate human trafficking, or to plan anti-trafficking activities or initiatives for the future (2010)

SWEDEN

INTRODUCTION

Background: A military power during the 17th century, Sweden has not participated in any war for almost two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000-02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

ECONOMY

Economy—overview: Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive

welfare benefits. It has a modern distribution system, excellent internal and external communications, and a skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydro-power, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for about 90% of industrial output, of which the engineering sector accounts for 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This and robust finances offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and growth continued downward in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove the strong rebound in 2010.

SWITZERLAND

INTRODUCTION

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations but retains a strong commitment to neutrality.

ECONOMY

Economy—overview: Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland's economy benefits from a highly developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. The Swiss have brought their economic practices largely into conformity with the EU's, in order to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The global financial crisis and resulting economic downturn put Switzerland in a recession in 2009 as global export demand stalled. The Swiss National Bank during this period effectively implemented a zero-interest rate policy in a bid to boost the economy and prevent appreciation of the franc. Switzerland's economy grew by 2.7% in 2010, when Bern implemented a third fiscal stimulus program, but its prized banking sector has recently faced significant challenges. The country's largest banks suffered sizable losses in 2008-09, leading its largest bank to accept a government rescue deal in late 2008. Switzerland has also come under increasing pressure from individual neighboring countries,

the EU, the US, and international institutions to reform its banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and it is working with Germany and the UK to resolve outstanding issues, particularly the possibility of imposing taxes on bank deposits held by foreigners. Parliament passed the first five double-taxation agreements, including that with the US, in March 2010. The agreement with the US awaits US Senate approval. In 2009, Swiss financial regulators ordered the country's largest bank to reveal at Washington's behest the names of US account-holders suspected of using the bank to commit tax fraud. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

SYRIA

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability, however, and experienced a series of military coups during its first decades. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In November 1970, Hafiz al-ASAD, a

member of the Socialist Ba'th Party and the minority Alawite sect, seized power in a bloodless coup and brought political stability to the country. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. During the 1990s, Syria and Israel held occasional peace talks over its return. Following the death of President al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role—were withdrawn in April 2005. During the July-August 2006 conflict between Israel and Hizballah, Syria placed its mili-

tary forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007 Bashar al-ASAD was elected to his second term as president. Influenced by major uprisings that began elsewhere in the region, antigovernment protests broke out in the southern province of Da'ra in March 2011 and spread to other Syrian cities. Protesters called for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. The government responded with a mix of force and concessions, including the repeal of the Emergency Law, but as of mid-April 2011 had not succeeded in quelling protests.

Flag description: three equal horizontal bands of red (top), white, and black; two small, green, five-pointed stars in a horizontal line centered in the white band; the band colors derive from the Arab Liberation flag and represent oppression (black), overcome through bloody struggle (red), to be replaced by a bright future (white); identical to the former flag of the United Arab Republic (1958-1961) where the two stars represented the constituent states of Syria and Egypt; the current design dates to 1980

note: similar to the flag of Yemen, which has a plain white band, Iraq, which has an Arabic inscription centered in the white band, and that of Egypt, which has a gold Eagle of Saladin centered in the white band

National anthem: name: "Humat ad-Diyar" (Guardians of the Homeland)

lyrics/music: Khalil Mardam BEY/Mohammad Salim FLAYFEL and Ahmad Salim FLAYFEL

note: adopted 1936, restored 1961; between 1958 and 1961, while Syria was a member of the United Arab Republic with Egypt, the country had a different anthem

ECONOMY

Economy—overview: Syrian economic growth remained in the 4-5% range in 2008-10 even though the global economic crisis affected oil prices and the economies of Syria's key export partners and sources of investment. Damascus has implemented modest economic reforms in the past few years, including cutting lending interest rates, opening private banks, consolidating all of the multiple exchange rates, raising prices on some subsidized items, most notably gasoline and cement, and establishing the Damascus Stock Exchange—which began operations in 2009. In addition, President ASAD signed legislative decrees to encourage corporate ownership reform, and to allow the Central Bank to issue Treasury bills and bonds for government debt. Nevertheless, the economy remains highly controlled by the government. Long-run economic constraints include declining oil production, high unemployment, rising budget deficits, and increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

TRANSNATIONAL ISSUES

Disputes—international: Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force

(UNDOF) patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation settles border dispute with Jordan; approximately two million Iraqis have fled the conflict in Iraq with the majority taking refuge in Syria and Jordan.

Refugees and internally displaced persons: refugees (country of origin): 1-1.4 million (Iraq); 522,100 (Palestinian Refugees (UNRWA))

IDPs: 305,000 (most displaced from Golan Heights during 1967 Arab-Israeli War) (2007)

Trafficking in persons: current situation: Syria is a destination and transit country for women and children trafficked for commercial sexual exploitation and forced labor; a significant number of women and children in the large and expanding Iraqi refugee community in Syria are reportedly forced into commercial sexual exploitation by Iraqi gangs or, in some cases, their families; women from Indonesia, Sri Lanka, the Philippines, Ethiopia, and Sierra Leone are recruited for work in Syria as domestic servants, but some face conditions of involuntary servitude, including long hours, non-payment of wages, withholding of passports, restrictions on movement, threats, and physical or sexual abuse

tier rating: Tier 2 Watch List—Syria again failed to report any law enforcement efforts to punish trafficking offenses in 2007; in addition, the government did not offer protection services to victims of trafficking and may have arrested, prosecuted, or deported some victims for prostitution or immigration violations; Syria has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

TAIWAN

INTRODUCTION

Background: In 1895, military defeat forced China to cede Taiwan to Japan. Taiwan reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the local population within the governing structure. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China—specifically the question of Taiwan's eventual status—as well as domestic political and economic reform.

Flag description: red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

National anthem: name: "Zhonghua Minguo guoge" (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; the anthem is also the song of the Kuomintang Party; it is informally known as "San Min Chu I" or "San Min Zhu Yi" (Three Principles of the People); because of political pressure from China, "Guo Qi Ge" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

ECONOMY

Economy—overview: Taiwan has a dynamic capitalist economy with gradually decreasing government guidance of investment and foreign trade. In keeping with this trend, some large, state-owned banks and industrial firms have been privatized. Exports, led by electronics and machinery, generate about 70% of Taiwan's GDP growth, and have provided the primary impetus for economic development. This heavy dependence on exports exposes the

economy to upturns and downturns in world demand. In 2009, Taiwan's GDP contracted 1.9%, due primarily to a 20% year-on-year decline in exports. In 2010 GDP grew 10.5%, as exports returned to the level of previous years. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, but so far Taiwan has been excluded from this greater economic integration, largely because of its diplomatic status. Taiwan's Total Fertility rate of just over one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 10.9% of the island's total population as 2011. The island runs a large trade surplus, and its foreign reserves are the world's fourth largest, behind China, Japan, and Russia. Since President MA Ying-jeou took office in May 2008, cross-strait economic ties have increased significantly. Since 2005 China has overtaken the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Taiwan has focused much of its efforts on improving the cross-strait economic relationship. Three financial memorandums of understanding, covering banking, securities, and insurance, took effect in mid-January 2010, opening the island to greater investments from the mainland's financial firms and institutional investors, and providing new opportunities for Taiwan financial firms to operate in China. Taiwan and the mainland in June 2010 signed the landmark Economic Cooperation Framework Agreement (ECFA), an agreement that the Taiwan authorities hope will eventually lead to a free-trade arrangement that will increase cross-strait economic ties by lowering tariffs on a number of goods and by reducing market access barriers for services. The Taiwan authorities have said that the ECFA will serve as a stepping stone toward trade pacts with other regional partners and they announced that formal negotiations towards an economic cooperation agreement with Singapore would begin in 2011. Closer economic links with the mainland brings greater opportunities for the Taiwan economy, but also poses new challenges. For example, FDI in China has resulted in Chinese import substitution away from Taiwan's exports and a restriction of potential job creation in Taiwan.

TRANSNATIONAL ISSUES

Disputes—international: involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam

over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan's claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan's unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

TADIKISTAN

INTRODUCTION

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia's hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Much of present-day Sughd province was transferred from the Uzbek SSR to the newly formed Tajik SSR in 1929. Ethnic Uzbeks form a substantial minority in Tajikistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992-97. Tajikistan experienced several security incidents in 2010, including a mass prison-break from a Dushanbe detention facility, the country's first suicide car bombing in Khujand, and armed conflict between government forces and opposition militants in the Rasht Valley. The country remains the poorest in the former Soviet sphere. Attention by the international community since the beginning of the NATO intervention in Afghanistan has brought increased economic development

and security assistance, which could create jobs and strengthen stability in the long term. Tajikistan is seeking WTO membership and has joined NATO's Partnership for Peace.

Flag description: three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic number "seven"—a symbol of perfection and the embodiment of happiness

National anthem: name: "Surudi milli" (National Anthem)

lyrics/music: Gulnazar KELDI/Suleiman YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

ECONOMY

Economy—overview: Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, as many as a million Tajik citizens work abroad, almost all of them in Russia, supporting families in Tajikistan through remittances. Less than 7% of the land area is arable. Cotton is the most important crop, and its production is closely monitored, and in many cases controlled, by the government. In the wake of the National Bank of Tajikistan's admission in December 2007 that it had improperly lent money to investors in the cotton sector, the IMF canceled its program in Tajikistan. A reform agenda is underway, according to which over half a billion dollars in farmer debt is being forgiven, and IMF assistance has been reinstated. Mineral resources include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992-97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. A debt restructuring agreement was reached with Russia in December 2002, including a \$250 million write-off of Tajikistan's \$300 million debt. Electricity output expanded with the completion of the Sangtuda I hydropower dam—finished in 2009 with Russian investment. The smaller Sangtuda-2, built with Iranian invest-

ment, is scheduled for completion in 2012. The government of Tajikistan is pinning major hopes on the massive Roghun dam which, if finished according to Tajik plans, will be the tallest dam in the world. The World Bank has agreed to fund technical, economic, social, and environmental feasibility studies for the dam. Favorable reports from these studies could create investor interest in the project, which is currently moving forward with domestic funding. In January 2010, the government began selling shares in the Roghun enterprise to its population, ultimately raising over \$180 million. According to numerous reports, many Tajik individuals and businesses were forced to buy shares. The coerced share sales finally ended in mid-2010 under intense criticism from donors, particularly the IMF. Tajikistan has received substantial infrastructure development loans from the Chinese government to improve roads and electricity transmission. To help increase north-south trade, the US funded a \$36 million bridge which opened in August 2007 linking Tajikistan with Afghanistan. While Tajikistan has experienced steady economic growth since 1997, more than half of the population continues to live in poverty. Economic growth reached 10.6% in 2004, but dropped below 8% in 2005-08, as the effects of higher oil prices and then the international financial crisis began to register—mainly in the form of lower prices for key export commodities and lower remittances from Tajiks working abroad.

TRANSNATIONAL ISSUES

Disputes—international: in 2006, China and Tajikistan pledged to commence demarcation of the revised boundary agreed to in the delimitation of 2002; talks continue with Uzbekistan to delimit border and remove minefields; disputes in Isfara Valley delay delimitation with Kyrgyzstan

Trafficking in persons: current situation: Tajikistan is a source country for women trafficked through Kyrgyzstan and Russia to the UAE, Turkey, and Russia for the purpose of commercial sexual exploitation; men are trafficked to Russia and Kazakhstan for the purpose of forced labor, primarily in the construction and agricultural industries; boys and girls are trafficked internally for various purposes, including forced labor and forced begging

tier rating: Tier 2 Watch List—Tajikistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat human trafficking, especially efforts to investigate, prosecute, convict, and sentence traffickers; despite evidence of low- and mid-level officials' complicity in trafficking, the government did not punish any public officials for trafficking complicity during 2007; lack of capacity and poor coordination between government institutions remained key obstacles to effective anti-trafficking efforts (2008)

Illicit drugs: major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption; Tajikistan seizes roughly 80% of all drugs captured in Central Asia and stands third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

TANZANIA

INTRODUCTION

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous

status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities. The formation of a government of national unity between Zanzibar's two leading parties succeeded in minimizing electoral tension in 2010

ECONOMY

Economy—overview: Tanzania is one of the world's poorest economies in terms of per capita income, however, Tanzania average 7% GDP growth per year between 2000 and 2008 on strong gold production and tourism. The economy depends heavily on agriculture, which accounts for more than 40% of GDP, provides 85% of exports, and employs about 80% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending on agriculture to 7% of its budget. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million. Dar es Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009-10 was a respectable 6% per year due to high gold prices and increased production.

TRANSNATIONAL ISSUES

Disputes—International: Tanzania still hosts more than a half-million refugees, more than any other African country, mainly from Burundi and the Democratic Republic of the Congo, despite the international community's efforts at repatriation; disputes with Malawi over the boundary in Lake Nyasa (Lake Malawi) and the meandering Songwe River remain dormant

Refugees and internally displaced persons: refugees (country of origin): 352,640 (Burundi); 127,973 (Democratic Republic of the Congo) (2007)

Illicit drugs: targeted by traffickers moving hashish, Afghan heroin, and South American cocaine transported down the East African coastline, through airports, or overland through Central Africa; Zanzibar likely used by traffickers for drug smuggling; traffickers in the past have recruited Tanzanian couriers to move drugs through Iran into East Asia.

THAILAND

INTRODUCTION

Background: A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and fighting alongside the US in Vietnam. A military coup in September 2006 ousted then Prime Minister THAKSIN Chinnawat. December 2007 elections saw the pro-THAKSIN People's Power Party (PPP) emerge at the head of a coalition government that took office in February 2008. The anti-THAKSIN People's Alliance for

Democracy (PAD, aka yellow-shirts) in May 2008 began street demonstrations against the new government, eventually occupying the prime minister's office in August and Bangkok's two international airports in November. After an early December 2008 court ruling that dissolved the ruling PPP and two other coalition parties for election violations, the Democrat Party formed a new coalition government and ABHISIT Wetchachiwa became prime minister. In October 2008 THAKSIN fled abroad in advance of an abuse of power conviction and has agitated his followers from abroad since then. THAKSIN supporters under the banner of the United Front for Democracy Against Dictatorship (UDD, aka red-shirts) rioted in April 2009, shutting down an ASEAN meeting in Pattaya. Following a February 2010 court verdict confiscating half of THAKSIN's frozen assets, the UDD staged large protests between March and May 2010, and occupied several blocks of downtown Bangkok. Clashes between security forces and protesters, elements of which were armed, resulted in at least 92 deaths and an estimated \$1.5 billion in arson-related property losses. These protests exposed major cleavages in the Thai body politic that continue to hamper the current government. The ABHISIT administration has announced a plan for a general election some time in 2011 ahead of its full term by the year-end. Since January 2004, thousands have been killed as separatists in Thailand's southern ethnic Malay-Muslim provinces increased the violence associated with their cause.

ECONOMY

Economy—overview: With a well-developed infrastructure, a free-enterprise economy, generally pro-investment policies, and strong export industries, Thailand enjoyed solid growth from 2000 to 2007—averaging more than 4% per year—as it recovered from the Asian financial crisis of 1997-98. Thai exports—mostly machinery and electronic components, agricultural commodities, and jewelry—continue to drive the economy, accounting for more than half of GDP. The global financial crisis of 2008-09 severely cut Thailand's exports, with most sectors experiencing double-digit drops. In 2009, the economy contracted 2.2%. In 2010, Thailand's economy expanded 7.6%, its fastest pace since 1995, as exports rebounded from their depressed 2009 level. Antigovernment protests during March-May and the country's polarized political situation had—at most—a temporary impact on business and consumer confidence. Although tourism was hit hard during the protests, its quick recovery helped boost consumer confidence to new highs. Moreover, business and investor sentiment remained buoyant as Thailand's stock market grew almost 5% during the three-month period. The economy probably will continue to experience high growth well into 2011.

by eradication efforts; also a drug money-laundering center; minor role in methamphetamine production for regional consumption; major consumer of metham-

phetamine since the 1990s despite a series of government crackdowns

TIMOR-LESTE

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives. On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. Between the referendum and the arrival of a multinational peacekeeping force in late September 1999, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into western Timor as refugees. Most of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999, the Australian-led peacekeeping troops of the International Force for East Timor (INTERFET) deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state. In late April 2006, internal tensions threatened the new nation's security when a military strike led to violence

and a near breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste in late May. In August, the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in April and June 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack and most of the rebels surrendered in April 2008. Since the unsuccessful attacks the government has enjoyed one of its longest periods of post-independence stability.

ECONOMY

Economy—overview: In late 1999, about 70% of the economic infrastructure of Timor-Leste was laid waste by Indonesian troops and anti-independence militias. Three hundred thousand people fled westward. Over the next three years a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. By the end of 2005, refugees had returned or had settled in Indonesia. The country continues to face great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed because there are no production facilities in Timor-Leste. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the

value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$6.6 billion as of October 2010. The economy continues to recover strongly from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. The government in 2008 resettled tens of thousands of an estimated 100,000 internally displaced persons (IDPs); most IDPs returned home by early 2009. Government spending increased markedly in 2009 and 2010, primarily on basic infrastructure, including electricity and roads. Limited experience in procurement and infrastructure building has hampered these projects. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

TOGO

INTRODUCTION

Background: French Togoland became Togo in 1960. Gen. Gnassingbé EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multiparty elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967 and maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from international organizations for human rights abuses, Togo is finally being re-welcomed into the international community.

ECONOMY

Economy—overview: This small, sub-Saharan economy suffers from anemic economic growth and depends heavily on both commercial and subsistence agriculture, which provides employment for 65% of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40%

of export earnings with cotton being the most important cash crop. Togo is the world's fourth-largest producer of phosphate. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors. Togo is on track with its IMF Extended Credit Facility and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Economic growth prospects remain marginal due to declining cotton production and underinvestment in phosphate mining.

TOKELAU

(TERRITORY OF NEW ZEALAND)

INTRODUCTION

Background: Originally settled by Polynesian emigrants from surrounding island groups, the Tokelau Islands were made a British protectorate in 1889. They were

transferred to New Zealand administration in 1925. Referenda held in 2006 and 2007 to change the status of the islands from that of a New Zealand territory to one of free association with New Zealand did not meet the needed threshold for approval.

The people rely heavily on aid from New Zealand—about \$10 million annually in 2008 and 2009—to maintain public services. New Zealand's support amounts to 80% of Tokelau's recurrent government budget. An international trust fund, currently worth nearly US\$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

Background: Tonga—unique among Pacific nations—never completely lost its indigenous governance. The archipelagos of “The Friendly Islands” were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific.

ECONOMY

Economy—overview: Tonga has a small, open, South Pacific island economy. It

has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, a continuing upturn in inflation, pressures for democratic reform, and rising civil-service expenditures are major issues facing the government.

TRINIDAD AND TOBAGO

INTRODUCTION

Background: First colonized by the Spanish,
 the islands came under British control in
 the early 19th century. The islands' sugar
 industry was hurt by the emancipation of
 the slaves in 1834. Manpower was replaced
 with the importation of contract laborers
 from India between 1845 and 1917, which
 boosted sugar production as well as the cocoa
 industry. The discovery of oil on Trinidad
 in 1910 added another important export.
 Independence was attained in 1962. The
 country is one of the most prosperous in
 the Caribbean thanks largely to petroleum
 and natural gas production and processing.
 Tourism, mostly in Tobago, is targeted for

expansion and is growing. The govern-
 ment is coping with a rise in violent crime.

ECONOMY

Economy—overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest growth rates and per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8%, significantly above the regional average of about 3.7% for that same period; however, GDP has slowed down since then and contracted about 3.5% in 2009, before rising more than 2% in 2010. Growth has been fueled by investments in liquefied natural gas (LNG), petrochemicals, and steel. Additional petrochemical, aluminum, and plastics projects are in various stages of planning. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports, but only 5% of employment. The country is also a regional financial center, and tourism is a growing sector, although it is not as important domestically as it is to many other Caribbean islands. The economy benefits from a growing trade surplus. The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues which will challenge the new government's commitment to maintaining high levels of public investment.

TUNISIA

INTRODUCTION

Background: Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in getting the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office

and replaced by Zine el Abidine BEN ALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of deaths. On 14 January 2011, the same day BEN ALI dismissed the government, he fled the country, and by late January 2011, Prime Minister Mohamed GHANNOUCHI announced the formation of a "national unity government" with the head of the Chamber of Deputies, Fouad M'BAZAA, as the interim president.

Flag description: red with a white disk in the center bearing a red crescent nearly encircling a red five-pointed star; resembles the Ottoman flag (red banner with white crescent and star) and recalls Tunisia's history as part of the Ottoman Empire; red represents the blood shed by martyrs in the struggle against oppression, white stands for peace; the crescent and star are traditional symbols of Islam

note: the flag is based on that of Turkey, itself a successor state to the Ottoman Empire

National anthem: *name:* "Humat Al Hima" (Defenders of the Homeland)

lyrics/music: Mustafa Sadik AL-RAFI and Aboul-Qacem ECHEBBI/Mohamad Abdel WAHAB

note: adopted 1957, replaced 1958, restored 1987; Mohamad Abdel WAHAB also composed the music for the anthem of the United Arab Emirates

ECONOMY

Economy—overview: Tunisia has a diverse economy, with important agricultural, mining, tourism, and manufacturing sectors. Governmental control of economic affairs while still heavy has gradually lessened over the past decade with increasing privatization, simplification of the tax structure, and a prudent approach to debt. Progressive social policies also have helped raise living conditions in Tunisia relative to the region. Real growth, which averaged almost 5% over the past decade, declined to 4.6% in 2008 and to 3.4% in 2009-10 because of economic contraction and slowing of import demand in Europe—Tunisia's largest export market. However, development of non-textile manufacturing, a recovery in agricultural production, and strong growth in the services sector somewhat mitigated the economic effect of slowing exports. Tunisia will need to reach even higher growth levels to create sufficient employment opportunities for an already large number of unemployed as well as the growing population of university graduates. The challenges ahead include:

privatizing industry, liberalizing the investment code to increase foreign investment, improving government efficiency, reducing the trade deficit, and reducing socioeconomic disparities in the impoverished south and west.

TURKEY

INTRODUCTION

Background: Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk or "Father of the Turks." Under his authoritarian leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a "post-modern coup"—of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the "Turkish Republic of Northern Cyprus," which only Turkey recognizes. A separatist insurgency begun in 1984 by the Kurdistan Workers' Party (PKK)—now known as the People's Congress of Kurdistan or Kongra-Gel (KKG)—has dominated the Turkish military's attention and claimed more than 30,000 lives. After the capture of the group's leader in 1999, the insurgents largely withdrew from Turkey mainly to northern Iraq. In 2004, KKG announced an end to its ceasefire and attacks attributed to the KKG increased. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community. Over the past decade, it has undertaken many reforms to strengthen its democracy and economy; it began accession membership talks with the European Union in 2005.

ECONOMY

Economy—overview: Turkey's economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 30% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding dynamism to the economy. Turkey's traditional textiles and clothing sectors still account for one-third of industrial employment, despite stiff competition in international markets that resulted from the end of the global quota system. Other sectors, notably the automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey's export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines also are being planned to help move Central Asian gas to Europe via Turkey, which will help address Turkey's dependence on energy imports over the long term. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth—averaging more than 6% annually until 2008, when global economic conditions and tighter fiscal policy caused GDP to contract in 2009, reduced inflation to 6.3%—a 34-year low—and cut the public sector debt-to-GDP ratio below 50%. Turkey's well-

regulated financial markets and banking system weathered the global financial crisis and GDP rebounded strongly to 7.3% in 2010, as exports returned to normal levels following the recession. The economy, however, continues to be burdened by a high current account deficit and remains dependent on often volatile, short-term investment to finance its trade deficit. The stock value of FDI stood at \$174 billion at year-end 2010, but inflows have slowed considerably in light of continuing economic turmoil in Europe, the source of much of Turkey's FDI. Further economic and judicial reforms and prospective EU membership are expected to boost Turkey's attractiveness to foreign investors. However, Turkey's relatively high current account deficit, uncertainty related to policy-making, and fiscal imbalances leave the economy vulnerable to destabilizing shifts in investor confidence.

Military—note: a "National Security Policy Document" adopted in October 2005 increases the Turkish Armed Forces (TSK) role in internal security, augmenting the General Directorate of Security and Gendarmerie General Command (Jandarma); the TSK leadership continues to play a key role in politics and considers itself guardian of Turkey's secular state; in April 2007, it warned the ruling party about any pro-Islamic appointments; despite on-going negotiations on EU accession since October 2005, progress has been limited in establishing required civilian supremacy over the military; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (the Kurdish problem), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peace-keeping responsibilities, and took charge of a NATO International Security Assistance Force (ISAF) command in Afghanistan in April 2007; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system (2008)

TRANSNATIONAL ISSUES

Disputes—international: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north

Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting from quarries

in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley;

Refugees and internally displaced persons: *IDPs:* 1-1.2 million (fighting 1984-99 between Kurdish PKK and Turkish military; most *IDPs* in southeastern provinces) (2007)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and

sea routes; major Turkish and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

TURKMENISTAN

INTRODUCTION

Background: Eastern Turkmenistan for centuries formed part of the Persian province of Khurasan; in medieval times Merv (today known as Mary) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia between 1865 and 1885, Turkmenistan became a Soviet republic in 1924. It achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves could prove a boon to this underdeveloped country once extraction and delivery projects are expanded. The Turkmen Government is actively working to diversify its gas export routes beyond the still dominant Russian pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. President for Life Saparmurat NYAZOV died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYAZOV, emerged as the country's new president.

ECONOMY

Economy—overview: Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 10% of GDP, it continues to employ nearly half of the country's workforce. With an authoritarian ex-Communist regime in power and a tribally based social structure, Turkmenistan has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient economy. Privatization goals remain limited. From 1998-2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003-08, largely because of higher international oil and gas prices. New pipelines to China and Iran, that began operation in early 2010, have given Turkmenistan additional export routes for its gas, although these new routes have not offset the sharp drop in export revenue since early 2009 from decreased gas exports to Russia. Overall prospects in the near future are discouraging because of widespread internal poverty, endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat's reluctance to adopt market-oriented reforms. In the past,

Turkmenistan's economic statistics were state secrets. The new government has established a State Agency for Statistics, but GDP numbers and other figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, numerous bureaucratic obstacles impede international business activity.

TRANSNATIONAL ISSUES

Disputes—international: cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2005, but Caspian seabed delimita-

tion remains stalled with Azerbaijan, Iran, and Kazakhstan due to Turkmenistan's indecision over how to allocate the sea's waters and seabed; bilateral talks continue with Azerbaijan on dividing the seabed and contested oilfields in the middle of the Caspian

Refugees and internally displaced persons: refugees (country of origin): 11,173 (Tajikistan); less than 1,000 (Afghanistan) (2007)

Illicit drugs: transit country for Afghan narcotics bound for Russian and Western European markets; transit point for heroin precursor chemicals bound for Afghanistan

TURKS AND CAICOS ISLANDS

(OVERSEAS TERRITORY OF THE UK)

INTRODUCTION

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

GEOGRAPHY

Location: Caribbean, two island groups in the North Atlantic Ocean, southeast of The Bahamas, north of Haiti

TUVALU

INTRODUCTION

Background: In 1974, ethnic differences within the British colony of the Gilbert and Ellice Islands caused the Polynesians of the Ellice Islands to vote for separation from the Micronesians of the Gilbert Islands. The following year, the Ellice Islands became the separate British colony of Tuvalu. Independence was granted in 1978. In 2000, Tuvalu negotiated a contract leasing its Internet domain name ".tv" for \$50 million in royalties over a 12-year period.

GEOGRAPHY

Natural hazards: severe tropical storms are usually rare, but in 1997 there were three cyclones; low level of islands make them sensitive to changes in sea level

Environment—current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary
Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling
 signed, but not ratified: none of the selected agreements

Geography—note: one of the smallest and most remote countries on Earth; six of the nine coral atolls—Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae—have lagoons open to the ocean; Nanumaya and Niutao have landlocked lagoons; Niulakita does not have a lagoon

ECONOMY

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because

of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

ECONOMY

Economy—overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government—with the support of foreign countries and international agencies—has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Uganda has received about \$2 billion in multilateral and bilateral debt relief. In 2007 Uganda received \$10 million for a Millennium Challenge Account Threshold Program. The global economic downturn has hurt Uganda's exports; however, Uganda's GDP growth is still relatively strong due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of government funding as oil comes on line in the next few years. Instability in southern Sudan is the biggest risk for the Ugandan economy in 2011 because Uganda's main export partner is Sudan, and Uganda is a key destination for Sudanese refugees.

UKRAINE

INTRODUCTION

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine was able to achieve a short-lived period of independence (1917–20), but was reconquered and forced to endure a brutal Soviet rule that engineered two forced famines (1921–22 and 1932–33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful

mass protest "Orange Revolution" in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary elections and become prime minister in August of 2006. An early legislative election, brought on by a political crisis in the spring of 2007, saw Yuliya TYMOSHENKO, as head of an "Orange" coalition, installed as a new prime minister in December 2007. Viktor YANUKOVYCH was elected president in a February 2010 run-off election that observers assessed as meeting most international standards. The following month, the Rada approved a vote of no-confidence prompting Yuliya TYMOSHENKO to resign from her post as prime minister.

ECONOMY

Economy—overview: After Russia, the Ukrainian republic was far and away the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to 10-year gas supply and transit contracts with Russia in January 2009 that brought gas prices to "world" levels. The strict terms of the contracts have further hobbled Ukraine's cash-strapped state gas company, Naftohaz. Outside institutions—particularly the IMF—have encouraged Ukraine to quicken the pace and scope of reforms. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine's economy was buoyant despite political turmoil between the prime minister and president until mid-2008. Real GDP growth exceeded 7% in 2006-07, fueled by high global prices for steel—Ukraine's

top export—and by strong domestic consumption, spurred by rising pensions and wages. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in November 2008 to deal with the economic crisis, but the Ukrainian Government's lack of progress in implementing reforms has twice delayed the release of IMF assistance funds. The drop in steel prices and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008 and the economy contracted more than 15% in 2009, among the worst economic performances in the world; growth resumed in 2010, buoyed by exports. External conditions are likely to hamper efforts for economic recovery in 2011.

country comparison to the world: 20

Telephones—mobile cellular: 55.333 million (2009)

country comparison to the world: 20

Telephone system: general assessment: Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 120 mobile phones per 100 people

international: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed

in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

Broadcast media: TV coverage is provided by Ukraine's state-controlled nationwide broadcast channel (UT1) and a number of privately-owned television broadcast networks; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; multi-channel cable and satellite TV services are available; Ukraine's radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

TRANSNATIONAL ISSUES

Disputes—international: 1997 boundary delimitation treaty with Belarus remains un-ratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete with preparations for demarcation underway; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and ongoing expert-level discussions; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's break-away Transnistria Region, which remains under OSCE supervision; the ICJ gave Ukraine until December 2006 to reply, and Romania until June 2007 to rejoin, in their dispute submitted in 2004

over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

UNITED ARAB EMIRATES

INTRODUCTION

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states—Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is on par with those of leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE's economy. However, in 2008-09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. In March 2011, about 100 Emirati activists and intellectuals posted on the Internet and sent to the government a petition calling for greater political reform, including the establishment of a parliament with full legislative powers and the further expansion of the electorate and the rights of the Federal National Council, the UAE's quasi-legislature. In April 2011, the Emirati Government

arrested four activists—all of whom signed the petition—for their alleged criticisms of the UAE system of government.

ECONOMY

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US, however, those talks have not moved forward. The country's Free Trade Zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices constricted the economy in 2009 and 2010. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. The economy is expected to continue a slow rebound. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for nationals through improved education and increased private sector employment.

TRANSNATIONAL ISSUES

Disputes—international: boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

UNITED KINGDOM

INTRODUCTION

Background: The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish republic withdraw from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council, a founding member of NATO, and of the Commonwealth, the UK pursues a global approach to foreign policy. The UK is also an active member of the EU, although it chose to remain outside the Economic and Monetary Union. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

GEOGRAPHY

Location: Western Europe, islands—including the northern one-sixth of the island of Ireland—between the North Atlantic Ocean and the North Sea; northwest of France

Geographic coordinates: 54 00 N, 2 00 W

Map references: Europe

Area: **total:** 243,610 sq km

country comparison to the world: 79

Area—comparative: slightly smaller than Oregon

Land boundaries: **total:** 360 km

border countries: Ireland 360 km

Coastline: 12,429 km

Maritime claims: territorial sea: 12 nm

exclusive fishing zone: 200 nm

continental shelf: as defined in continental shelf orders or in accordance with agreed upon boundaries

Climate: temperate; moderated by prevailing southwest winds over the North Atlantic Current; more than one-half of the days are overcast

Terrain: mostly rugged hills and low mountains; level to rolling plains in east and southeast

Elevation extremes:

lowest point: The Fens -4 m

highest point: Ben Nevis 1,343 m

Natural resources: coal, petroleum, natural gas, iron ore, lead, zinc, gold, tin, limestone, salt, clay, chalk, gypsum, potash, silica sand, slate, arable land

Land use: **arable land:** 23.23%

Freshwater withdrawal (domestic/industrial/agricultural): **total:** 11.75 cu km/yr (22%/75%/3%)

per capita: 197 cu m/yr (1994)

Natural hazards: winter windstorms; floods

Environment—current issues: continues to reduce greenhouse gas emissions (has met Kyoto Protocol target of a 12.5% reduction from 1990 levels and intends to meet the legally binding target and move toward a domestic goal of a 20% cut in

emissions by 2010); by 2005 the government reduced the amount of industrial and commercial waste disposed of in land-fill sites to 85% of 1998 levels and recycled or composted at least 25% of household waste, increasing to 33% by 2015

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Persistent Organic Pollutants, Air Pollution-Sulfur 94, Air Pollution-Volatile Organic Compounds, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Marine Life Conservation, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Tropical Timber 94, Wetlands, Whaling signed, but not ratified: none of the selected agreements

Geography—note: lies near vital North Atlantic sea lanes; only 35 km from France and linked by tunnel under the English Channel; because of heavily indented coastline, no location is more than 125 km from tidal waters

Flag description: blue field with the red cross of Saint George (patron saint of England) edged in white superimposed on the diagonal red cross of Saint Patrick (patron saint of Ireland), which is superimposed on the diagonal white cross of Saint Andrew (patron saint of Scotland); properly known as the Union Flag, but commonly called the Union Jack; the design and colors (especially the Blue Ensign) have been the basis for a number of other flags including other Commonwealth countries and their constituent

states or provinces, and British overseas territories

National anthem: name: "God Save the Queen"

lyrics/music: unknown

note: in use since 1745; by tradition, the song serves as both the national and royal anthem of the United Kingdom; it is known as either "God Save the Queen" or "God Save the King," depending on the gender of the reigning monarch; it also serves as the royal anthem of many Commonwealth nations

ECONOMY

Economy—overview: The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Over the past two decades, the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and the UK became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy particularly hard, due to the importance of its financial sector. Sharply declining home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN government to implement a number of measures to stimulate the economy and stabilize the financial markets; these include nationalizing parts of the banking system, cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, the CAMERON government in 2010 initiated a five-year austerity program, which aims to lower London's budget deficit from over 11% of GDP in 2010 to nearly 1% by 2015. The Bank of England periodically coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU).

TRANSNATIONAL ISSUES

Disputes—international: in 2002,
Gibraltar residents voted overwhelm-
ingly by referendum to reject any "shared
sovereignty" arrangement between the
UK and Spain; the Government of
Gibraltar insists on equal participa-
tion in talks between the two countries;
Spain disapproves of UK plans to grant
Gibraltar greater autonomy; Mauritius
and Seychelles claim the Chagos Archi-
pelago (British Indian Ocean Territory);
in 2001, the former inhabitants of the
archipelago, evicted 1967-1973, were
granted U.K. citizenship and the right of
return, followed by Orders in Council in
2004 that banned rehabilitation, a High
Court ruling reversing the ban, a Court
of Appeal refusal to hear the case, and a
Law Lords' decision in 2008 denying the
right of return; in addition, the United
Kingdom created the world's largest
marine protection area around the Chagos
islands prohibiting the extraction of any
natural resources therein; UK rejects
sovereignty talks requested by Argentina,
which still claims the Falkland Islands
(Islas Malvinas) and South Georgia and
the South Sandwich Islands; territorial
claim in Antarctica (British Antarctic
Territory) overlaps Argentine claim and
partially overlaps Chilean claim; Iceland,
the UK, and Ireland dispute Denmark's
claim that the Faroe Islands' continental
shelf extends beyond 200 nm

UNITED STATES

INTRODUCTION

Background: Britain's American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation's history were the Civil War (1861-65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and II and the end of the Cold War in 1991, the US remains the world's most powerful nation state. Over a span of more than five decades, the economy has achieved steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico

Geographic coordinates: 38°00'N, 97°00'W

Map references: North America

Area: total: 9,826,675 sq km

country comparison to the world: 3

land: 9,161,966 sq km

water: 664,709 sq km

note: includes only the 50 states and District of Columbia

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: total: 12,034 km

border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28 km

Coastline: 19,924 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semiarid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

note: the peak of Mauna Kea (4,207 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is the world's tallest mountain—higher than Mount Everest, which is recognized as the tallest mountain above sea level

Natural resources: coal, copper, lead, molybdenum, phosphates, rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

note: the US has the world's largest coal reserves with 491 billion short tons accounting for 27% of the world's total

Land use: arable land: 18.01%

permanent crops: 0.21%

per capita: 1,600 cu m/yr (2000)

Natural hazards: tsunamis; volcanoes; earthquake activity around Pacific Basin; hurricanes along the Atlantic and Gulf of Mexico coasts; tornadoes in the Midwest and Southeast; mud slides in California; forest fires in the west; flooding; permafrost in northern Alaska, a major impediment to development

volcanism: the United States experiences volcanic activity in the Hawaiian Islands,

Western Alaska, the Pacific Northwest, and in the Northern Mariana Islands; both Mauna Loa (elev. 4,170 m) in Hawaii and Mount Rainier (elev. 4,392 m) in Washington have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; Pavlof (elev. 2,519 m) is the most active volcano in Alaska's Aleutian Arc and poses a significant threat to air travel since the area constitutes a major flight path between North America and East Asia; St. Helens (elev. 2,549 m, famous for the devastating 1980 eruption, remains active today; numerous other historically active volcanoes exist, mostly concentrated in the Aleutian arc and Hawaii; they include: in Alaska: Aniakchak, Augustine, Chiginagak, Fourpeaked, Iliamna, Katmai, Kupreanof, Martin, Novarupta, Redoubt, Spurr, Wrangell; in Hawaii: Trident, Ugaishik-Peulik, Ukinrek Maars, Veniaminof; in the Northern Mariana Islands: Anatahan; and in the Pacific Northwest: Mount Baker, Mount Hood

Environment—current issues: air pollution resulting in acid rain in both the US and Canada; the US is the largest single emitter of carbon dioxide from the burning of fossil fuels; water pollution from runoff of pesticides and fertilizers; limited natural freshwater resources in much of the western part of the country require careful management; desertification

Environment—international agreements:

ECONOMY

Economy—overview: The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$47,200. In this market-oriented economy, private individuals and business firms make most of the decisions, and the

federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. The war in March-April 2003 between a US-led coalition and Iraq, and the subsequent occupation of Iraq, required major shifts in national resources to the military. Soaring oil prices between 2005 and the first half of 2008 threatened inflation and unemployment, as higher gasoline prices ate into consumers' budgets. Imported oil accounts for about 60% of US consumption. Long-term problems include inadequate investment in economic infrastructure, rapidly rising medical and pension costs of an aging population, sizable trade and budget deficits, and stagnation of family income in the lower economic groups. The merchandise trade deficit reached a record \$840 billion in 2008 before shrinking to \$506 billion in 2009, and ramping back up to \$630 billion in 2010. The global economic downturn, the sub-prime mortgage crisis, investment bank failures, falling home prices, and tight credit pushed the United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, the US Congress established a \$700 billion Troubled Asset Relief Program (TARP) in October 2008. The government used some of these funds to purchase equity in US banks and other industrial corporations, much of which had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack Obama signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. Approximately two-thirds of these funds were injected into the economy by the end of 2010. In March 2010, President Obama signed a health insurance reform bill into law that will extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. In July 2010, the president signed the DODD-FRANK Wall Street Reform and

Consumer Protection Act, a bill designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled banks that are "too big to fail," and improving accountability and transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. In November 2010, in an attempt to keep interest rates from rising and snuffing out the nascent recovery, the US Federal Reserve Bank (The Fed) announced that it would purchase \$600 billion worth of US Government bonds by June 2011.

TRANSNATIONAL ISSUES

Disputes—international: the US has intensified domestic security measures and is collaborating closely with its neigh-

bors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990 Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to work cooperatively to survey the Arctic continental shelf; The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease; Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states; Marshall Islands claims Wake Island; Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and internally displaced persons: refugees (country of origin): the US admitted 62,643 refugees during FY04/05 including: 10,586 (Somalia); 8,549 (Laos); 6,666 (Russia); 6,479 (Cuba); 3,100 (Haiti); 2,136 (Iran) (2006)

Illicit drugs: world's largest consumer of cocaine (shipped from Colombia through Mexico and the Caribbean), Colombian heroin, and Mexican heroin and marijuana; major consumer of ecstasy and Mexican methamphetamine; minor consumer of high-quality Southeast Asian heroin; illicit producer of cannabis, marijuana, depressants, stimulants, hallucinogens, and methamphetamine; money-laundering center

UNITED STATES PACIFIC ISLAND WILDLIFE REFUGES

(TERRITORIES OF THE US)

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Department of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land

birds, insects, and vegetation not found elsewhere.

Baker Island: The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was

disrupted by World War II and thereafter abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons. Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony.

Palmyra Atoll: The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are

managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

GEOGRAPHY

Location: Oceania

Baker Island: atoll in the North Pacific Ocean 1,830 nm (3,389 km) southwest of Honolulu, about half way between Hawaii and Australia

Howland Island: island in the North Pacific Ocean 1,815 nm (3,361 km) southwest of Honolulu, about half way between Hawaii and Australia

Jarvis Island: island in the South Pacific Ocean 1,305 nm (2,417 km) south of Honolulu, about half way between Hawaii and Cook Islands

Johnston Atoll: atoll in the North Pacific Ocean 717 nm (1,328 km) southwest of Honolulu, about one-third of the way from Hawaii to the Marshall Islands

Kingman Reef: reef in the North Pacific Ocean 930 nm (1,722 km) south of Honolulu, about half way between Hawaii and American Samoa

Midway Islands: atoll in the North Pacific Ocean 1,260 nm (2,334 km) northwest of Honolulu near the end of the Hawaiian Archipelago, about one-third of the way from Honolulu to Tokyo

Palmyra Atoll: atoll in the North Pacific Ocean 960 nm (1,778 km) south of Honolulu, about half way between Hawaii and American Samoa

Midway Islands: 15 km

Palmyra Atoll: 14.5 km

Maritime claims: territorial sea: 12 nm

exclusive economic zone: 200 nm

Climate: Baker, Howland, and Jarvis Islands: equatorial; scant rainfall, constant wind, burning sun

Johnston Atoll and Kingman Reef: tropical, but generally dry; consistent northeast trade winds with little seasonal temperature variation

Midway Islands: subtropical with cool, moist winters (December to February) and warm, dry summers (May to October); moderated by prevailing easterly winds; most of the 1,067 mm (42 in) of annual rainfall occurs during the winter

Palmyra Atoll: equatorial, hot; located within the low pressure area of the Inter-tropical Convergence Zone (ITCZ) where the northeast and southeast trade winds meet, it is extremely wet with between 4,000-5,000 mm (160-200 in) of rainfall each year

Terrain: low and nearly level sandy coral islands with narrow fringing reefs that have developed at the top of submerged volcanic mountains, which in most cases rise steeply from the ocean floor

Elevation extremes: lowest point: Pacific Ocean 0 m

highest point: Baker Island, unnamed location—8 m; Howland Island, unnamed location—3 m; Jarvis Island, unnamed location—7 m; Johnston Atoll, Sand Island—10 m; Kingman Reef, unnamed location—less than 2 m; Midway Islands, unnamed location—13 m; Palmyra Atoll, unnamed location—3 m

Natural resources: terrestrial and aquatic wildlife

Land use: arable land: 0%

permanent crops: 0%

other: 100% (2008)

Natural hazards: Baker, Howland, and Jarvis Islands: the narrow fringing reef surrounding the island can be a maritime hazard

Kingman Reef: wet or awash most of the time, maximum elevation of less than 2 m makes Kingman Reef a maritime hazard

Midway Islands, Johnston, and Palmyra Atolls: NA

Environment—current issues: Baker, Howland, and Jarvis Islands, and Johnston Atoll: no natural freshwater resources

Kingman Reef: none

Midway Islands and Palmyra Atoll: NA

Geography—note: Baker, Howland, and Jarvis Islands: scattered vegetation consisting

of grasses, prostrate vines, and low growing shrubs; primarily a nesting, roosting, and foraging habitat for seabirds, shorebirds, and marine wildlife; closed to the public

Johnston Atoll: Johnston Island and Sand Island are natural islands, which have been expanded by coral dredging; North Island (Akau) and East Island (Hikina) are manmade islands formed from coral dredging; the egg-shaped reef is 34 km in circumference; closed to the public

Kingman Reef: barren coral atoll with deep interior lagoon; closed to the public

Midway Islands: a coral atoll managed as a NWR and open to the public for wildlife-related recreation in the form of wildlife observation and photography

Palmyra Atoll: the high rainfall and resulting lush vegetation make the environment of this atoll unique among the US Pacific Island territories; supports a large undisturbed stand of *Pisonia* beach forest

PEOPLE

Population: no indigenous inhabitants
note: public entry is by special-use permit from US Fish and Wildlife Service only and generally restricted to scientists and educators; visited annually by US Fish and Wildlife Service

Johnston Atoll: in previous years, an average of 1,100 US military and civilian contractor personnel were present; as of May 2005, all US government personnel had left the island

Midway Islands: approximately 40 people make up the staff of US Fish and Wildlife

Service and their services contractor living at the atoll

Palmyra Atoll: four to 20 Nature Conservancy, US Fish and Wildlife staff, and researchers

GOVERNMENT

note on Palmyra Atoll: incorporated Territory of the US; partly privately owned and partly federally owned; administered from Washington, DC by the Fish and Wildlife Service of the US Department of the Interior; the Office of Insular Affairs of the US Department of the Interior continues to administer nine excluded areas comprising certain tidal and submerged lands within the 12 nm territorial sea or within the lagoon

Legal system: the laws of the US where applicable apply

Diplomatic representation from the US: none (territories of the US)

Flag description: the flag of the US is used

ECONOMY

Economy—overview: no economic activity

TRANSPORTATION

Airports: Baker Island: one abandoned World War II runway of 1,665 m covered with vegetation and unusable

Howland Island: airstrip constructed in 1937 for scheduled refueling stop on the round-the-world flight of Amelia EARHART and Fred NOONAN; the aviators left Lae, New Guinea, for Howland Island but were never seen again; the airstrip is no longer serviceable

Johnston Atoll: one closed and not maintained

Kingman Reef: lagoon was used as a halfway station between Hawaii and American Samoa by Pan American Airways for flying boats in 1937 and 1938

Midway Islands: 3—one operational (2,409 m paved); no fuel for sale except emergencies

Palmyra Atoll: 1–1,846 m unpaved runway; privately owned (2010)

Ports and terminals: Baker, Howland, and Jarvis Islands, and Kingman Reef: none; offshore anchorage only

Johnston Atoll: Johnston Island

Midway Islands: Sand Island

Palmyra Atoll: West Lagoon

INTRODUCTION

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLLE in the early 20th century established widespread political, social, and economic reforms that established a statist tradition. A violent

Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s, led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

Flag description: nine equal horizontal stripes of white (top and bottom) alternating with blue; a white square in the upper hoist-side corner with a yellow sun bearing a human face known as the Sun of May with 16 rays that alternate between triangular and wavy; the stripes represent the nine original departments of Uruguay; the sun symbol evokes the legend of the sun breaking through the clouds on 25 May 1810 as independence was first declared from Spain (Uruguay subsequently won its independence from Brazil)

note: the banner was inspired by the national colors of Argentina and by the design of the US flag

National anthem: name: "Himno Nacional" (National Anthem of Uruguay)

lyrics/music: Francisco Esteban ACUNA de Figueroa/Francisco Jose DEBALI

note: adopted 1848; the anthem is also known as "Orientales, la Patria o la tumba!" ("Uruguayans, the Fatherland or Death!"); it is the world's longest national anthem in terms of music (105 bars; almost five minutes); generally only the first verse and chorus are sung

agricultural sector, a well-educated work force, and high levels of social spending. Following financial difficulties in the late 1990s and early 2000s, economic growth for Uruguay averaged 8% annually during the period 2004-08. The 2008-09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.9% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth exceeded 8% in 2010.

TRANSNATIONAL ISSUES

Disputes—international: in 2010, the ICJ ruled in favor of Uruguay's operation of two paper mills on the Uruguay River, which forms the border with Argentina; the two countries formed a joint pollution monitoring regime; uncontested boundary dispute between Brazil and Uruguay over Brazilera/Brasiliera Island in the Quaraí/Cuareim River leaves the tripoint with Argentina in question; smuggling of firearms and narcotics continues to be an issue along the Uruguay-Brazil border

Illicit drugs: small-scale transit country for drugs mainly bound for Europe, often through sea-borne containers; law enforcement corruption; money laundering because of strict banking secrecy laws; weak border control along Brazilian frontier; increasing consumption of cocaine base and synthetic drugs

UZBEKISTAN

INTRODUCTION

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of "white gold" (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land poisoned and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on agriculture while developing its mineral and petroleum reserves. Current concerns include terrorism by Islamic militants,

economic stagnation, and the curtailment of human rights and democratization.

GEOGRAPHY

Location: Central Asia, north of Turkmenistan, south of Kazakhstan

Geographic coordinates: 41 00 N, 64 00 E

Map references: Asia

Area: total: 447,400 sq km

country comparison to the world: 56

land: 425,400 sq km

water: 22,000 sq km

Area—comparative: slightly larger than California

Land boundaries: total: 6,221 km

border countries: Afghanistan 137 km, Kazakhstan 2,203 km, Kyrgyzstan 1,099 km, Tajikistan 1,161 km, Turkmenistan 1,621 km

Coastline: 0 km (doubly landlocked); note—Uzbekistan includes the southern portion of the Aral Sea with a 420 km shoreline

Maritime claims: none (doubly landlocked)

Climate: mostly midlatitude desert, long, hot summers, mild winters; semiarid grassland in east

Terrain: mostly flat-to-rolling sandy desert with dunes; broad, flat intensely irrigated river valleys along course of Amu Darya, Syr Darya (Sirdaryo), and Zarafshon; Fergana Valley in east surrounded by mountainous Tajikistan and Kyrgyzstan; shrinking Aral Sea in west

Elevation extremes:

lowest point: Saryqamish Kuli -12 m

highest point: Adelunga Toghi 4,301 m

Natural resources: natural gas, petroleum, coal, gold, uranium, silver, copper, lead and zinc, tungsten, molybdenum

Land use: arable land: 10.51%

permanent crops: 0.76%
other: 88.73% (2005)

Irrigated land: 42,810 sq km (2003)

Total renewable water resources:

72.2 cu km (2003)

Freshwater withdrawal (domestic/industrial/agricultural): total: 58.34 cu km/yr (5%/2%/93%)

per capita: 2,194 cu m/yr (2000)

Natural hazards: NA

Environment—current issues: shrinkage of the Aral Sea is resulting in growing concentrations of chemical pesticides and natural salts; these substances are then blown from the increasingly exposed lake bed and contribute to desertification; water pollution from industrial wastes and the heavy use of fertilizers and pesticides is the cause of many human health disorders; increasing soil salination; soil contamination from buried nuclear processing and agricultural chemicals, including DDT

Environment—international agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Ozone Layer Protection, Wetlands signed, but not ratified: none of the selected agreements

Geography—note: along with Liechtenstein, one of the only two doubly land-locked countries in the world

ECONOMY

Economy—overview: Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, including natural gas and petroleum, provided about 40% of foreign exchange earnings in 2009. Other major export earners include gold and cotton. Uzbekistan is now the world's second-largest cotton exporter and fifth-largest producer; it has come under increasing international criticism for the use of child labor in its annual cotton harvest. Nevertheless, Uzbekistan enjoyed a bumper cotton crop in 2010 amidst record high prices. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF, providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. Potential investment by Russia and China in Uzbekistan's gas and oil industry, as well as increased cooperation with South Korea in the realm of civil aviation, may boost growth prospects. However, decreased demand for natural gas in Europe and Russia in the wake of the global financial crisis could reduce energy-related revenues in the near term. In November 2005, Russian President Vladimir PUTIN and Uzbekistan Presi-

dent KARIMOV signed an "alliance," which included provisions for economic and business cooperation. Russian businesses have shown increased interest in Uzbekistan, especially in mining, telecom, and oil and gas. In 2006, Uzbekistan took steps to rejoin the Collective Security Treaty Organization (CSTO) and the Eurasian Economic Community (EurASEC), which it subsequently left in 2008, both organizations dominated by Russia. In the past Uzbek authorities had accused US and other foreign companies operating in Uzbekistan of violating Uzbek tax laws and have frozen their assets, but no new expropriations occurred in 2008-09. Instead, the Uzbek Government has actively courted several major U.S. and international corporations, offering attractive financing and tax advantages, and has landed a significant US investment in the automotive industry. Although growth slowed in 2009-10, Uzbekistan has seen few other effects from the global economic downturn, primarily due to its relative isolation from the global financial markets.

TRANSNATIONAL ISSUES

Disputes—international: prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan creates water-sharing difficulties for Amu Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons: refugees (country of origin): 39,202 (Tajikistan); 1,060 (Afghanistan)

IDPs: 3,400 (forced population transfers by government from villages near Tajikistan border) (2007)

Trafficking in persons: current situation: Uzbekistan is a source country for women and girls trafficked to Kazakhstan, Russia, Middle East, and Asia for the purpose of commercial sexual exploitation; men are trafficked to Kazakhstan and Russia for purposes of forced labor in the construction, cotton, and tobacco industries; men and women are also trafficked internally

for the purposes of domestic servitude, forced labor in the agricultural and construction industries, and for commercial sexual exploitation

tier rating: Tier 2 Watch List—Uzbekistan is on the Tier 2 Watch List for its failure to provide evidence of increasing efforts to combat severe forms of trafficking in 2007; the government did not amend its criminal code to increase penalties for convicted traffickers; in March 2008, Uzbekistan adopted ILO Conventions on minimum age of employment and on the elimination of the worst forms of child labor and is working with the ILO

on implementation; the government also demonstrated its increasing commitment to combat trafficking in March 2008 by adopting a comprehensive anti-trafficking law; Uzbekistan has not ratified the 2000 UN TIP Protocol (2008)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

ECONOMY

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visi-

tors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

INTRODUCTION

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became

Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Hugo CHAVEZ, president since 1999, seeks to implement his "21st Century Socialism," which purports to alleviate social ills while at the same time attacking capitalist globalization and existing democratic institutions. Current concerns include: a weakening of democratic institutions, political polarization, a politicized military, drug-related violence along the Colombian border, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars

on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the province of Guayana

National anthem: *name:* "Gloria al bravo pueblo" (Glory to the Brave Nation) *lyrics/music:* Vicente SALIAS/Juan Jose LANDAETA

note: adopted 1881; the lyrics were written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela's struggle for independence

ECONOMY

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 55% of the federal budget revenues, and around 30% of GDP. A nationwide strike between December 2002 and February 2003 had far-reaching economic consequences—real GDP declined by around 9% in 2002 and 8% in 2003—but economic output recovered strongly through 2008. Fueled by high oil prices, record government spending helped to boost GDP by about 10% in 2006, 8% in 2007, and nearly 5% in 2008, before a sharp drop in oil prices caused a contraction in 2009-10. This spending, combined with recent minimum wage hikes and improved access to domestic credit, created a consumption boom which came at the cost of higher inflation—roughly 32% in 2008, and slowing only slightly to 30% in 2010, despite the lengthy downturn. Imports also jumped significantly before the recession of 2009. President Hugo CHAVEZ's continued efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors have hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In the first half of 2010 Venezuela faced the prospect of lengthy nationwide blackouts when its main hydroelectric power plant—which provides more than 35% of the country's electricity—nearly shut down. In May, 2010, CHAVEZ closed the unofficial foreign exchange market—the "parallel" market—in an effort to stem inflation and slow the currency's depreciation. In June 2010, the government created the "Transaction System for Foreign Currency Denominated Securities" (SITME) to replace the "parallel" market. In December 2010, CHAVEZ eliminated the dual exchange rate system and unified the exchange rate at 4.3 bolivars per dollar. In January 2011, CHAVEZ announced the second devaluation of the bolivar within twelve months. In December 2010, the National Assembly passed a package of five organic laws designed to complete the transformation of the Venezuelan economy in line with CHAVEZ's vision of

21st century socialism. These laws likely will be implemented in 2011. Venezuela began 2011 wrestling with macroeconomic imbalances resulting from the government's unorthodox economic policies, a housing crisis, and a continuing electricity crisis.

TRANSNATIONAL ISSUES

Disputes—international: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the United Nations Convention on the Law of the Sea (UNCLOS) that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime

boundary and Venezuelan-administered Los Monjes islands near the Gulf of Venezuela; Colombian-organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; in 2006, an estimated 139,000 Colombians sought protection in 150 communities along the border in Venezuela; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan EEZ/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Trafficking in persons: current situation: Venezuela is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; child prostitution in urban areas and child sex tourism in

resort destinations appear to be growing; Venezuelan women and girls are trafficked for commercial sexual exploitation to Western Europe, Mexico, and Caribbean destinations

tier rating: Tier 2 Watch List—Venezuela is placed on the Tier 2 Watch List, up from Tier 3, as it showed greater resolve to address trafficking through law enforcement measures and prevention efforts in 2007, although stringent punishment of offenders and victim assistance remain lacking (2008)

illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

VIETNAM

INTRODUCTION

Background: The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by Communist forces under Ho Chi MINH. Under

the Geneva Accords of 1954, Vietnam was divided into the Communist North and anti-Communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under Communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam's "doi moi" (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The Communist leaders, however, maintain control on political expression and have resisted outside calls to improve human rights. The country continues to experience small-scale protests from various groups, the vast majority connected to land-use issues, calls for increased political space and the lack of equitable mechanisms for resolving disputes. Various ethnic minorities, such as the Montagnards of the Central Highlands and the Khmer Krom in the southern delta region, have also held protests.

of a centrally-planned economy. While Vietnam's economy remains dominated by state-owned enterprises (SOEs), which still produce about 40% of GDP, Vietnamese authorities have reaffirmed their commitment to economic liberalization and international integration. They have moved to implement the structural reforms needed to modernize the economy and to produce more competitive export-driven industries. Vietnam joined the WTO in January 2007 following more than a decade-long negotiation process. Vietnam became an official negotiating partner in the developing Trans-Pacific Partnership trade agreement in 2010. Agriculture's share of economic output has continued to shrink from about 25% in 2000 to about 20% in 2010, while industry's share increased from 36% to 41% in the same period. Deep poverty has declined significantly and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year. The global recession has hurt Vietnam's export-oriented economy, with GDP in 2009-10 growing less than the 7% per annum average achieved during the last decade. In 2010, exports increased by more than 25%, year-on-year, but the trade deficit remained high, prompting the government to consider administrative measures to limit the trade deficit. Vietnam's managed currency, the dong, continues to face downward pressure due to a persistent trade imbalance, and, since 2008, the government devalued it by 20% through a series of small devaluations. Foreign donors pledged nearly \$8 billion in new development assistance for 2011. However, the government's strong growth-oriented economic policies have caused it to struggle to control one of the region's highest inflation rates, which reached 11.8% in 2010. Vietnam's economy also faces challenges from falling foreign exchange reserves, an undercapitalized banking sector, and high borrowing costs. The near-bankruptcy and subsequent default of the SOE Vinashin, a leading shipbuilder, led to a ratings downgrade of Vietnam's sovereign debt, exacerbating Vietnam's borrowing difficulties.

claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired

by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

Illicit drugs: minor producer of opium poppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns

VIRGIN ISLANDS

(TERRITORY OF THE US)

INTRODUCTION

Background: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

ECONOMY

Economy—overview: Tourism is the primary economic activity, accounting for 80% of GDP and employment. The islands hosted 2.4 million visitors in 2008. The manufacturing sector consists of petroleum

refining, rum distilling, textiles, electronics, pharmaceuticals, and watch assembly. One of the world's largest petroleum refineries is at Saint Croix. The agricultural sector is small, with most food being imported. International business and financial services are small but growing components of the economy. The islands are vulnerable to substantial damage from storms. The government is working to improve fiscal discipline, to support construction projects in the private sector, to expand tourist facilities, to reduce crime, and to protect the environment.

WAKE ISLAND

(TERRITORY OF THE US)

INTRODUCTION

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940-41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, which remains a vital strategic link in the Pacific region.

WALLIS AND FUTUNA

(OVERSEAS COLLECTIVITY OF FRANCE)

INTRODUCTION

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed this status in July 1961.

GEOGRAPHY

Location: Oceania, islands in the South Pacific Ocean, about two-thirds of the way from Hawaii to New Zealand

Geographic coordinates: 13 18 S, 176 12 W

Environment—current issues: deforestation (only small portions of the original forests remain) largely as a result of the continued use of wood as the main fuel source; as a consequence of cutting down the forests, the mountainous terrain of Futuna is particularly prone to erosion; there are no permanent settlements on Alofi because of the lack of natural freshwater resources

Geography—note: both island groups have fringing reefs

WEST BANK

INTRODUCTION

Background: The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and the Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank and Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled following the outbreak of an intifada in September 2000. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel

still controls maritime, airspace, and most access to the Gaza Strip. In January 2006, the Islamic Resistance Movement, HAMAS, won control of the Palestinian Legislative Council (PLC). HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. Violent clashes between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007 resulted in numerous Palestinian deaths and injuries. In February 2007, ABBAS and HAMAS Political Bureau Chief MISHAL signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting continued in the Gaza Strip, and in June 2007, HAMAS militants succeeded in a violent takeover of all military and governmental institutions in the Gaza Strip. ABBAS dismissed the NUG and through a series of presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. HAMAS rejected the NUG's dismissal, and despite multiple rounds of Egyptian-brokered reconciliation negotiations, the two groups have failed to bridge their differences. The status quo remains with HAMAS in control of the Gaza Strip

and ABBAS and the Fatah-dominated PA governing the West Bank. FAYYAD and his PA government continue to implement a series of security and economic reforms to improve conditions in the West Bank. ABBAS has said he will not resume negotiations with current Prime Minister NETANYAHU until Israel halts all settlement activity in the West Bank and Jerusalem.

ECONOMY

Economy—overview: The West Bank—the larger of the two areas comprising the Palestinian territories—experienced a high single-digit economic growth rate in 2010 as a result of inflows of donor aid, the Palestinian Authority's (PA) implementation of economic and security reforms, and the easing of some movement and access restrictions by the Israeli Government. Nevertheless, overall standard-of-living measures remain near levels seen

prior to the start of the second intifada in 2000. The almost decade-long downturn largely has been a result of Israeli closure policies—a steady increase in movement and access restrictions across the West Bank in response to Israeli security concerns which have disrupted labor and trade flows, industrial capacity, and basic commerce, both external and internal. Since 2008, the PA under President Mahmoud ABBAS and Prime Minister Salam FAYYAD has implemented a largely successful campaign of institutional reforms that has contributed to increased security and economic performance, supported by more than \$3 billion in direct foreign donor assistance to the PA's budget since 2007. An easing of some Israeli restrictions on West Bank movement and access since 2008 also has contributed to an uptick in retail activity in larger cities. The biggest impediments to economic improvements in the West Bank remain Palestinians' lack of access to land and resources in Israeli-controlled areas, import and export restrictions, and a high-cost capital structure. Absent robust private sector growth, the PA will continue to rely heavily on donor aid for its budgetary needs.

A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 UN-brokered cease-fire; a UN-organized referendum on the territory's final status has been repeatedly postponed. The UN since 2007 has sponsored intermittent talks between representatives of the Government of Morocco and the Polisario Front to negotiate the status of Western Sahara. Morocco has put forward an autonomy

proposal for the territory, which would allow for some local administration while maintaining Moroccan sovereignty. The Polisario, with Algeria's support, demands a popular referendum that includes the option of independence.

ECONOMY

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in July 2006 signed a four-year agreement allowing European vessels to fish off the coast of Morocco, including the disputed waters off the coast of Western Sahara. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

YEMEN

INTRODUCTION

Background: North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border. Fighting in the northwest between the government and Huthi rebels, a group seeking a return to traditional Zaydi Islam, began in 2004 and has since resulted in seven rounds of fighting—the last ended in early 2010 with a tentative ceasefire. The southern secessionist movement was revitalized in 2008 when a popular socioeconomic protest movement initiated the prior year took on political goals including secession. Public rallies in Sana'a against President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster. Media reports indicated that as many as 100 protesters had been killed and many more injured amid the protests. Domestic and international efforts to mediate a resolution to the political crisis had not yielded a deal as of mid April.

ECONOMY

Economy—overview: Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP and 70% of government revenue. Yemen has tried to counter the effects of its declining oil resources by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts towards economic and political reform, and in August 2010 the IMF approved a three-year \$370 million program to further this effort. Despite these ambitious endeavors, Yemen continues to face difficult long term challenges, including declining water resources and a high population growth rate.

INTRODUCTION

Background: The territory of Northern Rhodesia was administered by the [British] South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices, economic mismanagement and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. The new president launched an anticorruption investigation in 2002 to probe high-level corruption during the previous administration. In 2006-07, this task force successfully prosecuted four cases, including a landmark civil case in the UK in which former President CHILUBA and numerous others were found liable for more than USD 41 million. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his abrupt death in August 2008, he was succeeded by his Vice President Rupiah BANDA, who subsequently won a special presidential by-election in October 2008. Under President BANDA, the Task Force on Corruption was abolished, President CHILUBA and his wife were acquitted in their criminal cases, and the government declined to register the UK civil verdict.

ECONOMY

Economy—overview: Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005-10 about 6% per year. Privatization of government-owned copper mines in the 1990s relieved the government from covering mammoth losses generated by the industry and greatly increased copper mining output and profitability to spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. In 2005, Zambia qualified for debt relief under the Highly Indebted Poor Country Initiative, consisting of approximately USD 6 billion in debt relief. Poverty remains a significant problem in Zambia, despite a stronger economy. Zambia's dependency on copper makes it vulnerable to depressed commodity prices, but record high copper prices and a bumper maize crop in 2010 helped Zambia rebound quickly from the world economic slowdown that began in 2008. A high birth rate, relatively high HIV/AIDS burden, and market distorting agricultural policies have meant that Zambia's economic growth has not dramatically decreased the stubbornly high poverty rates.

TRANSNATIONAL ISSUES

Disputes—international: in 2004, Zimbabwe dropped objections to plans

between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced persons: refugees (country of origin): 42,565 (Angola); 60,874 (Democratic Republic of the Congo); 4,100 (Rwanda) (2007)

Illicit drugs: transshipment point for moderate amounts of methaqualone, small amounts of heroin, and cocaine

bound for southern Africa and possibly Europe; a poorly developed financial infrastructure coupled with a government commitment to combating money laundering make it an unattractive venue for money launderers; major consumer of cannabis

ZIMBABWE

INTRODUCTION

Background: The UK annexed Southern Rhodesia from the [British] South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 2000, caused an exodus of white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. The ruling ZANU-PF party used fraud and intimidation to win a two-thirds majority in the March 2005 parliamentary election, allowing it to amend the constitution at will and recreate the Senate, which had been abolished in the late 1980s. In April 2005, Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. President MUGABE

in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months. General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. MDC opposition leader Morgan TSVANGIRAI won the most votes in the presidential polls, but not enough to win outright. In the lead up to a run-off election in late June 2008, considerable violence enacted against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing government, in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders have yet failed to agree upon many key outstanding governmental issues. Mugabe in October publicly called for early elections in 2011–two years before his term ends—but no election date has been set.

ECONOMY

Economy—overview: Zimbabwe's
economy is growing at a brisk pace
despite continuing political uncer-
tainty. Following a decade of contrac-
tion, Zimbabwe's economy recorded
real growth of 5.9% in 2010. But the
government of Zimbabwe still faces a
number of difficult economic problems,
including a large external debt burden
and insufficient formal employment.
Zimbabwe's 1998-2002 involvement in
the war in the Democratic Republic
of the Congo drained hundreds of
millions of dollars from the economy.
The government's land reform program,
characterized by chaos and violence, has
badly damaged the commercial farming
sector, the traditional source of exports
and foreign exchange and the provider
of 400,000 jobs, turning Zimbabwe
into a net importer of food products.
The EU and the US provide food aid
on humanitarian grounds, though on
a smaller scale than before. Until early
2009, the Reserve Bank of Zimbabwe
routinely printed money to fund the
budget deficit, causing hyperinflation.
The power-sharing government formed in
February 2009 has led to some economic
improvements, including the cessation of
hyperinflation by eliminating the use of
the Zimbabwe dollar and removing price
controls. The economy is registering
its first growth in a decade, but will be
reliant on further political improvement
for greater growth.

TRANSNATIONAL ISSUES

Disputes—international: Botswana built electric fences and South Africa has placed military along the border to stem the flow of thousands of Zimbabweans fleeing to find work and escape political persecution; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced persons: refugees (country of origin): 2,500 (Democratic Republic of Congo)

IDPs: 569,685 (MUGABE-led political violence, human rights violations, land reform, and economic collapse) (2007)

Trafficking in persons: current situation: Zimbabwe is a source, transit, and destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; large scale migration of Zimbabweans to surrounding countries—as they flee a progressively more desperate situation at home—has increased; rural Zimbabwean men, women, and children are trafficked internally to farms for agricultural labor and domestic servitude and to cities for domestic labor and commercial sexual exploitation; NGOs believe internal trafficking increased during the year, largely due to the closure of schools, worsening political violence, and a faltering economy; young men and boys are trafficked to South Africa for farm work, often laboring for months in South Africa without pay before “employers” have them arrested and deported as illegal immigrants; young women and girls are lured abroad with false employment offers that result in involuntary domestic servitude or commercial sexual exploitation; men, women, and children from neighboring states are trafficked through Zimbabwe en route to South Africa

tier rating: Tier 3—the Government of Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government made minimal progress in combating trafficking in 2008, and members of its military and the former ruling party's youth militias perpetrated acts of trafficking on local populations; anti-trafficking efforts were further weakened as it failed to address Zimbabwe's economic and social problems during the reporting period, thus increasing the population's vulnerability to trafficking within and outside of the country (2009)

Illicit drugs: transit point for cannabis and South Asian heroin, mandrax, and methamphetamines en route to South Africa

APPENDIX D

CROSS-REFERENCE LIST OF COUNTRY DATA CODES

FIPS 10: Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions (FIPS 10) is maintained by the Office of Targeting and Transnational Issues, National Geospatial-Intelligence Agency, and published by the National Institute of Standards and Technology (Department of Commerce). FIPS 10 codes are intended for general use throughout the US Government, especially in activities associated with the mission of the Department of State and national defense programs.

ISO 3166: Codes for the Representation of Names of Countries (ISO 3166) is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange.

STANAG 1059: Letter Codes for Geographical Entities (8th edition, 2004) is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the ISO 3166 Alpha-2 list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

CROSS-REFERENCE LIST OF HYDROGRAPHIC DATA CODES

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Factbook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

APPENDIX G

WEIGHTS AND MEASURES

Note: At this time, only three countries - Burma, Liberia, and the US - have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.

MATHEMATICAL NOTATION

MATHEMATICAL POWER	NAME
10^{18} or 1,000,000,000,000,000,000	one quintillion
10^{15} or 1,000,000,000,000,000	one quadrillion
10^{12} or 1,000,000,000,000	one trillion
10^9 or 1,000,000,000	one billion
10^6 or 1,000,000	one million
10^3 or 1,000	one thousand
10^2 or 100	one hundred
10^1 or 10	ten
10^0 or 1	one
10^{-1} or 0.1	one-tenth
10^{-2} or 0.01	one-hundredth
10^{-3} or 0.001	one-thousandth
10^{-6} or 0.000 001	one-millionth
10^{-9} or 0.000 000 001	one-billionth
10^{-12} or 0.000 000 000 001	one-trillionth
10^{-15} or 0.000 000 000 000 001	one-quadrillionth
10^{-18} or 0.000 000 000 000 000 001	one-quintillionth

THE ESSENTIAL GUIDE TO WORLD FACTS AND FIGURES

From Afghanistan to Zimbabwe, *The CIA World Factbook 2012* offers complete and up-to-date information on the world's nations. Updated for 2012 with details on politics, populations, military expenditures, and economics, it will be helpful whether you are keeping track of events in world hotspots like Pakistan and China, or double-checking your knowledge of Bolivia and Germany.

**For each country included,
The CIA World Factbook 2012 offers:**

- Detailed maps with new geopolitical data
- Statistics on the population of each country, with details on literacy rates, HIV prevalence, and age structure
- New data on military expenditures and capabilities
- Details on important political parties
- Information for diplomatic consultation
- Facts on transportation and communication infrastructure
- Geography and natural resources
- And much more!

Included are appendixes with useful abbreviations, international environmental agreements, international organizations and groups, weight and measure conversions, and more. Originally intended for use by U.S. government officials, this is a must-have resource for students, travelers, journalists, and business people with a desire to know more about the international community in which we live and work.
